124. Jobs
125. Jobs Details
126. ■■■■■■■■■ ■■■■■■■■■■ (■■ / ■■■■■■■■■■■■)
127. Associate SQA
128. B2B Business Development Executive
129. Business Development Executive
130. Job description
131. Dot Net Developer (Mid-Level)
132. Full Stack Engineer (Angular + Java) & AI / ML Engineer (LLM, OCR, AWS
133. Marketing Executive
134. Multiple positions
135. Multiple posts
136. .NET + React Developer
137. Software Solution Architect
138. About WADIC
139. ZTBL Recruitment Drive (300 Officer Grade III Positions)
140. News Details
141. Alumni Homecoming 2024
142. Celebrating Alumni Success!
143. Inspiring the Next Generation of Gaming Professionals!
144. Mr. Azam Jamil Commends Namal University's Progress During Inspiring Visit
145. Namal Alumni Elections are now LIVE
146. Namal Alumni Elections on April 12, 2025
147. Namal University Library Hosts Successful Book Fair
148. Namal University's Electrical Engineering Delegation Shines at AI-Innofest 2024
149. Namal University's Electrical Engineering Department Ignites Innovation with Inaugural Robotic Competition
150. Seminar on How Things Work at US Universities
151. Soft Skills, a must for Career Readiness!
152. Stand with Your Batch Rep — By-Elections on November 24th

153. Stories
154. Stories Details
155. A journey shaped by learning, leadership, & the spirit of giving back.
156. Breaking Barriers: The Confidence Namal Instilled
157. From Namal to Beijing: A Journey of Learning, Ethics, and Growth
158. From Namal to Cutting-Edge Research in AI and Agriculture
159. Message for Aspiring Scholars at Namal
160. From Namal to Tampere: A Journey of Perseverance and Opportunity
161. From Rooftops to CloudOps: A NAMALite's Journey to Building Global Infrastructures
162. Head of Development at Techporate Private Limited
163. Journey From Namal (Dhoke Mangwal) to Europe
164. Namal to New Horizons: A Multitasking Engineer's Odyssey at METU
165. Innovating the Future with AI and Big Data
166. About CAID
167. Namal HPC
168. Featured Projects
169. Community Engagement
170. Linkages & Collaborations
171. Industry Support for Projects
172. Academic & Research Partnerships
173. Government Partnerships
174. 2nd Position at PINTECH 2025
175. Accelerate Your Ideas with Supercomputing
176. Dr. Tassadaq Hussain was honored to be the Guest of Honor and Invited Speaker at Innovative Lyallpur – The University of Faisalabad
177. Full Stack Ecosystem for Processor Based Chip Design
178. School on Supercomputing and Parallel programming
179. Summer School on RISC-V Embedded Systems for Industrial Applications
180. Real-Time High-Speed Seed Sorting System
181. Our Team
182. Leadership
183. Research Associates
184. Junior Research Assistants
185. Hardware-Software Co-Design for AI Accelerators and Compilers on RISC-V Platforms
186. Course Objective
187. Course Outcomes
188. Course Modules
189. Registeration Closed
190. Oops!
191. We Are Proud
192. Our Mission
193. Our Vision
194. Our Responsibility
195. Recent Jobs
196. Event Highlights
197. Namal University Provides Scholarship For Talented Student!
198. Recent News
199. Open House 2025
200. Open House 2024
201. Open House 2023
202. Open House 2022
203. Graduate Directory
204. We have 94 Graduate Students
205. ADMISSION AWARENESS SESSION - 2024
206. Admissions for Fall 2025 are now OPEN
207. International Forest Day

208. NAMAL CODEX '24
209. NAMALTECH EXPO-2024
210. A Novel CFD-ANN Framework for the prediction of Real Time Flow Features.
211. A SaaS (Software as a Service) Model for Skill Testing System
212. A study of CRYSTALS Kyber and AI based attack on CRYSTALS Kyber
213. Academics insight (an online consultant-based business)
214. Add support for Zba extensions to cv32e40p
215. Adoption of Rainwater Harvesting Techniques for Sustainable Agriculture in Tharparkar.
216. Advanced Learning Management System
217. AgriSense: An AI Powered Platform for Image-Based Crop Health Monitoring and Yield Estimation
218. AI-Based medical health analysis system
219. AI-Driven Honeybee and Beehive Health Monitoring System for Disease Detection and Population Analysis
220. AI-Enhanced Data Analytics Platform
221. AI Powered Anomaly Detection Using Wazuh and ELK
222. Ai-Powered Education Platform
223. AI-Powered Interviewing System
224. Aloe Solution: Aloe Vera Health Detection and Product Development in Pakistan.
225. Ami Events
226. An Autonomous Robot with Self Navigation and Book Placement for Library
227. An EMG Based Virtual Reality System For Improving Hemiplegic Motor Disorder
228. An Online Intelligent Rice Classification System
229. An Optimization Model for Multi-Period Production Planning And Scheduling
230. An unsupervised method for validation and detection of optic disk
231. ANIMATED VIDEO GENERATION USING TEXT PROMPTS
232. Anti-Vehicle Collision and Driver Drowsiness Monitoring System
233. Application Tracking System
234. Applications of artificial neural network to nanofluid problems
235. Automated Evaluation (Context based) of Handwritten Assessment
236. Automated Network penetrator
237. Automated Voltage Regulating Transformer with IOT Based Monitoring System
238. BeeGuardian
239. Bifurcation analysis and optical soliton solutions of the kundu eckhaus equation in birefringent fiber
240. Billboards Management Portal
241. Blockchain Based Secure Document Storage
242. Blooming Business: Sow and Grow with VitWOS
243. Brand Comparison (Limelight Vs Beech Tree)
244. Briding the Gap - MLOps
245. BUILD AN ENERGY MANAGEMENT DASHBOARD USING SIEMENS SCADA SYSTEM
246. Call Data Record Analyzer (FIA)
247. Capital budgeting of mixed-use tower for Ideas Real estate Marketing Pvt
248. Career Guidance System
249. Casual Garments (online drop shipping)
250. Caught in the middle: the effect of economic sanctions on Russia's decoupling from global market
251. Cellular Traffic Prediction using Federated Learning
252. Characterization of Cauchy-like Complex Matrices
253. “Classification & Blockage of Network Traffic with respect to different applications”
254. Classifying Song Genres Using Machine Learning
255. Cloud Based Rice Classification Application Development Using Deep Neural Networks
256. ClubZ Platform (Management of reciprocal club visits)
257. Comparative analysis of lung cancer detection using Machine learning
258. Comparative Analysis of Optimal Techniques for Sleepiness Detection
259. Connectedness between meme stocks and meme coins
260. Contactless Automatic Attendance Management System
261. Context Aware Recommendation System using Deep Learning Techniques
262. Conversational AI Powered Banking: Enhancing Customer Support

263. CrickBot (Cricket Batting Analysis using computer vision and machine learning)
264. Crop Smart Monitoring and Yield Prediction
265. Currency Detection System for Blind People
266. Customer Churn Analysis Using Machine Learning Techniques.
267. Customer Segmentation through Machine Learning
268. Customer Sentiment Analysis Using Social Media
269. Data Analysis and Mathematical Modeling of Social Media Content
270. Data Driven Approach to predict crop price and suitable location to sell the crops.
271. Deepfake Detection
272. Design An Autonomous Robot For Disinfection Of Enclosed Spaces
273. Design and Implementation of a Pipelined RISC-V Processor with RV32IC Support
274. Design and Implementation of RISC-V Processor for AES Algorithm
275. Design and Implementation of Single Precision Floating Point Unit (FPU) in RISC-V Processor
276. Design and Integration of Branch Predictors in CV32E40P core
277. Design of a Piezoelectric Based Low Power Charging System for Portable Electronic Devices
278. Design of Multiport DC-DC Converter for Electric Vehicles
279. Designing Strategic Compensation system for Fri Chicks Restaurant
280. Development of a RISC-V Based SoC Architecture using Open Source Tools for FPGA Technology
281. Development of MIPI Camera Interface for FPGAs
282. Digitization of Urdu text
283. Dual Power Generation System Using Wind and Solar Energy
284. Dynamic hiring system
285. E-commerce Webiste
286. Early Flood Warning System And Reservoir Optimization: Model For Namal Dam
287. Economics and Marketing of Biofloc Technology
288. Efficient Hybrid Home System
289. Embarkation of Marketing blend (Conventional and Digital)
290. Emotion Recognition for Urdu Speech to Text Conversion
291. Energy Efficiency Enhancement in Commercial Buildings Usings Analytical Dashboards
292. Equity Analysis of Cement Sector
293. Estimation Generator Platform
294. Exploring community perceptions of natural hazards and vulnerability through data analysis by machine learning
295. EZ Chat: Patient Communication Platfrom
296. Farm Management System (FMS) Software
297. Farmer to Farmer Knowledge shairing mobile application
298. “Feasibility of Biofloc Fish Farming Technology in Pakistan”
299. Financial Analysis of PepsiCo by using R
300. Financial Analytics of Telecommunication Sector using Tableau
301. Financial Crisis Prediction (A Machine Learning Apporach)
302. FINTOK (Stocks Investment Learning System)
303. Fiteligence: Real-Time AI-Driven Workout Assistant
304. Fixed Point Theorems with Applications in Solutions of Matrix Equations
305. Forecasting Higher Moments Of Returns For Emerging Markets
306. Forecasting of Photovoltaic (PV) Generation and Load for Optimized Energy Management
307. Fravell
308. Functional Verification of MIPI (Mobile Industry Processor Interface) Core using GTKWave and UVM-SV in Questa-Sim.
309. Generative AI Powered Customer Support Chatbot
310. Grab Amazon, Grab Dollars
311. Ground and Excited States of Quantum Harmonic Oscillator
312. Halal Wealth Wisdom (Centralize Platform For Islamic Finance Knowledge)
313. Health Information System Pediatric
314. Herbs Identification Using Machine Learning.
315. High-Speed Object Classification using Gigabit Multimedia Serial Link (GMSL) Camera and Embedded GPU Board for Industrial Applications

316. How and When leader turnover intention increases in organization
317. HR Analytics
318. HR analytics using Tableau
319. Hybrid Electric System with an IoT based Smart Energy Meter
320. Hybrid Mode Electric Vehicle Charging Station with Dual Axis Rotation Of Solar PV
321. Image Regeneration with Human and AI collaboration
322. Images Based AI Algorithm for Soil Analysis
323. Impact of Islamic Financial Literacy on Farmers' Earnings and Development of Value Added Short-term Islamic Agricultural Financing Product
324. Impact of technology on farmer's financial well-being: An empirical evidence of Pakistan
325. IMPROVED RETINAL VESSEL SEGMENTATION FRAMEWORK
326. Indigenous affordable Easywash
327. Industrial project on Human Resource Analytics
328. Industrial Use and Commercial Value of Garlic G1.(Research)
329. Information Extraction from National Identity Cards using Automation - Custom ID Card OCR
330. Integration and Verification of L1 Data Cache in SweRV EH1 RISC-V Core
331. Integration of Augmented Reality in Marketing Communication
332. Integration of Bit Manipulation Extension in the SweRV EH1 Core of RISC-V Processor and its Verification Using Standard Tools
333. Intelligent Content Analyzer
334. IoT-Based Crop Monitoring System for Namal's AgriTech Farm
335. IoT based Smart Irrigation System
336. IoT-based Smart Irrigation System with Weather Forecasting
337. Is brand coolness addictive?
338. K Mart (Entrepreneurial Project)
339. Land Record Management System Using Blockchain
340. Learning mathematics through intellectual physical games for primary level students
341. Learning pioneer.com
342. Legal Document Analyzer
343. LensLook: An AR Customized Solution_ Bringing Beauty to Reality
344. Leveraging Waste for Sustainability: Economical Agricultural Solution.
345. Livestock Breed Identification using image analysis Technique
346. Machine Learning-Based Seed Classification and Controlled Sowing System
347. malt-aye
348. Malware Detection in Encrypted Traffic Through Machine Learning
349. Market Analysis of Sesame: Unlocking the Potential
350. Marketing analysis of industry using tableau
351. Marketing analytics
352. Mass Reporting System - Intelligent Traffic Violation Detection System
353. Mathematical Analysis for Transmission Dynamics of Rotavirus Diseaese with Environmental Effects
354. Mathematical Analysis of Cancer Cells Dynamics in a Human Body
355. Mathematical Analysis of Different Inventory Management Models for Optimization
356. Mathematical Modelling and Analytical Simulation of Nanofluid Problem
357. Mathematical Study for the Dynamical Behavior of Toxoplasmosis Disease in a Population
358. Maximum Power Point Tracking (MPPT) Charge Controller.
359. Mental Mechanism For Learning Linear Algebra In APOS Theory Perspective
360. Multi-objective Task Scheduling in Heterogeneous Cloud Computing Environment
361. Naik-E
362. NAMAL Green Block Factory (Entrepreneurial Project)
363. Namal Placement Assistant
364. Namhal
365. NaMillions Delivering the Innovative & Highly Quality Products on Daraz
366. Network Intrusion Detection System
367. Network Packet processing at line rate by bypassing the Linux kernel.
368. Neural Computing in CFD for drag and lift predictions in channel flows.
369. Non-Negative Matrix Factorization; with Application in Image Processing

370. Nutrients Deficiency Detection in Crops using Machine Learning
371. On-Road Vehicle Breakdown Assistance
372. Online Mobile Stores
373. Open-Source SIEM for Enhanced Security
374. Organic Poultry Farming: Raising Chicks and Selling Mature Birds
375. Organizing an Organization.
376. Parho Pakistan: AI-Driven Sponsorship and Academic Monitoring Platform
377. Pathway analysis of newly developed measurement scale of e-shopper's perceived risk: An application of theory of planned behaviour
378. PDF Chat Bot: Document Based Conversations
379. Peanut (Groundnut) Value Chain Analysis
380. perfomix
381. Performance Evaluation of Micro Financial Institues by using Fuzzy Topsis Technique
382. Performance Simulator for RISC-V Processor Architecture
383. Perimeter Security Assessment of Pakistan's Web Assets
384. Personality-Based Candidate Recommendation System Using MBTI for Recruitment
385. Prediction of Mental Health Problems in University Students Using Machine Learning
386. Price Stability of Stone-backed Cryptocurrencies
387. Prime Accessories
388. Project Management System
389. Prospects and Challenges of Meat Sector in Pakistan, The Study of Potohar Region
390. Punjabi Speech Recognition
391. Qualtribe (End to End Solution for services Startup)
392. Queen of Fashion (Online Clothes branding and Cosmetics)
393. Real Time Gas Leakage Monitoring and Prevention
394. Realization and Implementation of Communication for Hearing Impaired & Inarticulate People
395. Reconfigurable bandpass filter using Spoof Surface Plasmon Polaritons
396. Retail Sales Analytics and Forecasting Platform
397. Revenue Forecasting for Nayatel: Addressing Subscription Fluctuations and Customer Churn Challenges
398. Revenue management strategies for optimizing hostel profitablity
399. Revolutionizing Natural Sweetener For Health Conscious Consumers With Lense OF Stevia
400. Robotic Process Automation in collaboration with Mercurial Minds
401. Robust Control of Under-Actuated Electromechanical System
402. Roman Urdu to Urdu and English Translation
403. RouteBuddy
404. SentinelAI: A Plug-and-Play AI Framework for Edge and Cloud Deployment
405. SEO and Website audit Boost Your Rankings and Drive Traffic to Your Site
406. Sharia Compliance and Corporate Fraud: Myth or Reality?
407. Sign Language Translator using Accelerometers and Deep Learning
408. Simultaneous Object Detection and Tracking
409. Skin Disease Detection
410. Skin Diseases and Recommender Portal- Pores Be Pure – The Revolution
411. Smart Bacterial Colony Classification System using visual Images and AI
412. Smart BioFloc Water Management System.
413. Smart City Traffic Management System
414. Smart Foot Weight Analytics for Health Diagnosis
415. Smart Hydroponics: IoT & ML-Driven Sustainable Farming
416. Smart Minutes of Meeting
417. Smart Security System(SSS)
418. SMART WHEELCHAIR
419. Soil analysis using machine learning
420. Solar Panel Cleaning Robot with Monitoring System
421. Solutions of Some Functional-Integral Equations in Banach Algebra
422. Solving Linear and Non Linear System Through Neural Networks
423. Spillover effect of cryptocurrencies on sukuks
424. Stock Price Prediction by using ML & its Application on Webpage

425. Stroke Prediction by using Optimization Techniques and Algorithms based on ML.
426. Study of Quantum-Mechanical Transmissions and Reflections
427. Studying Diversity In Genetic Programming
428. Supply chain and distribution of flood relief aid
429. TA’AM KHANA
430. Talent Acquisition With AI
431. TechSTEM
432. The analysis of the advancement of e-commerce industry of Pakistan using Tableau
433. The Cultivation and Feasibility Study of Dragon Fruit in Pakistan
434. The Hostelite (Entrepreneurial venture)
435. The impact of Islamic financial literacy on the Growth and Performance of Islamic Banking in Pakistan.
436. The Journey of a Field Medalist:Maryam Mirzakhani
437. The study to Insolvencies
438. Tiktok Shop: Exploring Consumers on Tiktok Shop
439. Topological Data Analysis of MNIST Dataset
440. Tradipure: Energize Naturally, Live fully
441. Travel to Explore
442. Trip-guru
443. Trojan Detection in RISC-V
444. Tunable Frequency Selective Surface (FSS) for Filter and EMI Shielding Applications
445. Twitter Management System
446. Underwater ROV (Remotely Operated Vehicle): Search Purpose
447. Unified Millimeter-Wave and Microwave MIMO Antenna Integration for Enhanced 5G Applications
448. United State Dollar(USD) and Portfolio Diversification: Evidence Form Core South Asian Countries.
449. Unsymmetrical Faults Detection in Three Phase Transmission Lines
450. Urdu Based ASR System
451. Urdu Parts of Speech Tagging
452. Urdu Text to Speech
453. Virtual Medical AI Assistant
454. Waste Segregation System for recycling facilities
455. Water Treatment via Ozonation using PV Panel
456. Withania Coagulans Herbal Tea: A Branded Approach for Diabetic Care in Pakistan
457. Homecomming 2025
458. Important Dates
459. Registrations
460. Academic Partners
461. Accomdation
462. Conference Scientific Committee
463. CONFERENCE SECRETARIAT

1. Library code of conducts

Library patrons are expected to observe the following rules while using the library services. Violation of these rules may incur disciplinary action. Keep your mobiles on silent mode (or switched off) while being in the library. You are not allowed to attend a call inside the library. Drinks and eatables are not allowed in the library. Smoking is strictly prohibited in the library Sleeping is not allowed in library Don't write and scratch the library furniture. In case of irreversible damage, you'll be heavily fined (up to Rs. 5000). Do not write, highlight, underline, mark, or fold pages of the books. Library books are examined on return and the borrower will be held responsible. In case of severe damage, you'll have to return a new copy of the book (same print) or pay the price of the book. Group discussions are not allowed in the library. Complete silence should be observed, except for brief and subdued talk with the library staff If any library user disturbs the study environment w...

2. Borrowing Policy

Standard books are regular items which can be borrowed by any library user (patron) for a time frame mentioned in the table below. Patron Category Can hold a book for Max no. of books issued Student 14 Days 7 Staff 30 Days 3 Faculty 30 Days 15 Books can only be renewed for a further 2 times if another user has not reserved them. Overdue books will not be re-issued until the fine is paid. Two copies of same title will not be issued. Non-issuable materials such as reference books, magazines, journals are not checked out. These must

not be removed from the library. Under exceptional circumstances, reference book can be borrowed overnight. You can borrow it just before the library closes, and it must be returned by next morning. It cannot be borrowed over the weekend. All issued books must be returned to the library by the due date. In case of overdue books, a fine will be charged, as mentioned in the fine policy. Books will only be issued to the person appearing at the circulation desk. Y...

3. Reservation Policy

In order to support fair usage and optimal sharing of the collection, borrowed books can be reserved. If you need a book which has already been borrowed by someone else, you can request a reservation. Library staff maintains a reservation queue for borrowed items. Simply ask the library staff to place your name in the queue. You must also provide a valid email address so that you could be notified once the book is returned. Following policies apply: You cannot reserve the same book which has already been issued to you. If no one else reserved the book, you can get it re-issued on the day of return. Reserved book will be issued to the one who is topmost in the reservation queue. If (s) he willingly declines, the book will be issued to the next in the queue, and so on. If you have reserved a book, it is your responsibility to contact the circulation desk on its day of return. Library staff will wait for you till 12:00 noon next working day. If you do not appear, your name will be removed...

4. Fine Policy

To encourage and impose timely return of the library materials, fines are charged on over-due items. Borrowers are solely responsible for returning or renewing items by the due date. If the items are not returned by due date, fine will be charged at the following rate: Rs. 10 per day for an overdue book will be charged to all students. In case of overdue of reference material that library will issue for overnight to anyone but under exceptional circumstances, Library will be charged 100 rupees per day. If a library patron reports that the book is lost, (s)he will have to pay twice the price of the book or return a new copy. Note that the fine will keep on incurring till the price paid or book returned. For students, the maximum fine limit before they can be issued books any further is Rs. 600. If the cumulative fine crosses that limit, or in other words, if you accumulates more than 30 overdue days on your borrowings, you will not be issued books anymore. Your library account will be s...

5. Library Clearance

Students must get clearance from respective departments in order to obtaining their degrees. Library clearance will not be declared unless (s) he: Returns all borrowed books Pays outstanding library dues (fine, book cost, etc.) Appears for the disciplinary action against violation of library rules The Librarian will notify the Controller of Examinations (and respective HoDs) the list of library defaulters for necessary actions. Note that the library clearance will be marked only by the Librarian or In-charge Library. No other library staff is authorized to sign the clearance form.

6. Stock Taking

The library will undertake a stocktaking process every year. This includes a number of different activities, such as verification of library inventory, rectification of records, examination and conditioning of books, and process calibration. For this purpose, the library will be closed for user. All books on loan with the borrowers will have to be returned before the date by the Librarian in-charge Library for this purpose. Exact dates of stocktaking will be communicated well in advance. If a books return date is going to lie within the stocktaking period, it will not be issued. During Stocktaking lending of all borrowable will be suspended. Koha home Log in to your account: Login: Password: Show password

By Elections 2025 | Namal Alumni

https://alumni.namal.edu.pk/alumni-by-elections

NAMAL ALUMNI ASSOCIATION BY-ELECTIONS 2025

By-Elections

If any executive position becomes vacant, the President or Secretary will notify the Steering Committee, which will subsequently announce elections to fill the vacant post. The nomination process for the announced seats will begin shortly after and applicants will campaign online until the voting process begins. Candidates interested in running for office must meet eligibility criteria and undergo a verification process to be considered for nomination. The Steering Committee will disqualify candidates who do not meet these criteria.

General Eligibility Criteria for all Nominees

The candidate must not have any disciplinary case against him/her and should demonstrate a professional demeanor. The candidate must not be an active member of the Executive Committee/Council of the Alumni Association of any other university locally or abroad. The candidate must be able to dedicate the required time to run the affairs of Namal Alumni Association. The candidate must not have any criminal record and should not be involved in harassment at workplace. Preference shall be given to candidates with proven track record of social work and entrepreneurial spirit. Such candidates will have to share supporting documents for proof and impact of their work.

General Elections Process

Stage 1: Announcement of Elections The elections should be announced publicly at least 05 weeks in advance of the election date. After the elections are announced, the Namal University Alumni will register on the portal and initiate the electoral process by applying for various executive posts. Stage 2: Nomination Period The interested candidates can submit their nominations online within the specified period. One candidate can't apply for more than one post if held eligible. Stage 3: Verification of Candidates The interested candidates will undergo a scrutiny process to verify their eligibility by the Namal Alumni Association Steering Committee. Stage 4: Campaigning The nominated candidates will conduct an election campaign by coming up with an election manifesto and action plan to serve the Namal Alumni Association. Stage 5: Announcement of Election Results After verification by NAASC and subsequent approval from the Rector, election results will be communicated to the alumni associa...

Alumni Association | Namal Alumni

https://alumni.namal.edu.pk/alumni-introduction

Namal Alumni Association

Namal University Mianwali aims to establish Namal Alumni Association to strengthen its bond with alumni and ensure inclusion of its Alumni in uplift of the university and its overall wellbeing. The association is set to be entrusted with the responsibility to engage Alumni in meaningful initiatives focused on Student/Alumni development, Academia-Industry linkages, Endowment fund, and Academic & Strategic advisory. In order to discharge its duties, the association will be given a formal hierarchical structure approved by the Hon. Rector. The Rector as Chief Patron will head the Alumni Association and rest of the members will be elected through democratic elections to be held every 03 years. The Association once formed will work on a resolved Policy Framework outlining the Rules of Business agreed upon by majority of the executive body members and approved by the Rector. Vision: To act as a foundation for fostering and sustaining excellence in Namal Alumni Relations. Mission: To establis...

Alumni Homecoming 2024

By Admin Namal University Mianwali, hosted Alumni Homecoming on 16 Feb 2024. The event turned out to be a resounding success. Alumni, their family and friends turned up in great numbers. The event showcased number of acts, performances, and celebrated shared student experiences and the university's progress. Laughter, camaraderie, and a sense of belonging filled the air as alumni reconnected and reminisced about their time at Namal. We extend heartfelt gratitude to the attendees for making the event a success and look forward to more such reunions.

Namal University Library Hosts Successful Book Fair

By Admin Libraries around the world play a crucial role in promoting the culture of book reading as it provides a healthy, intellectual, and rewarding pastime. With considerable decline in the book reading culture it is critical for libraries to organize meaningful public engagements for raising awareness about the value of book reading for personal and professional development. Along the same lines the Library at Namal University Mianwali organized a Book Fair on 5th of March 2024. Th event turned into a massive success. Public and students from nearby educational institutes participated in the event.

Namal University's Electrical Engineering Delegation Shines at AI-Innofest 2024

By Admin A student delegation from the Electrical Engineering Department Namal University Mainwali led by Dr. Sami Ud Din participated in AI-Innofest 2024 organized by Center of Excellence - Artifical Intelligence Bahria University. The team from Namal University showcased their project focused on application of AI in Robotics at the competition and have secured runners up position in Robotics category. This significant achievement showcases the quality of education imparted in students at Namal University, especially the Lab component which is given special focus in all disciplines at Namal University so that students can have a well founded understanding of the applied knowledge.

Seminar on How Things Work at US Universities

By Admin Namal University, Mianwali, had the honor to host Dr. Muhammad Ishtiaq Hussain - Lead Manufacturing Project Manager at the headquarters of General Motors Corporation, USA, for a Seminar on How Things Work at US Universities? The resource person shared insights on the initiatives of US Universities to keep a close liaison with industries for swift placement of their graduates. He highlighted the flexibility of universities to update and align their curriculum with industry requirements and appreciated Namal's initiative of conducting Industry-focused final-year projects (FYPs).

Soft Skills, a must for Career Readiness!

By Admin Namal University Mianwali actively explores opportunities focused on student development to enhance their compatibility and align their skill set with market requirements. This week, Namal University in

collaboration with The Punjab Educational Endowment Fund (PEEF) has organized a 02-day Training Program on “Soft Skills” for Namal University, Mianwali students. Soft skills including interpersonal skills, coordination, problem-solving, time management, teamwork, and leadership were focused. The training concluded with a certificate distribution ceremony.

A journey shaped by learning, leadership, & the spirit of giving back.

After graduating from Namal, I began my professional journey in software development and eventually grew into project management. Over eight years in the industry, I have worked with leading organizations and today serve as a project manager in a multinational company. Namal played an important role in shaping my foundation by supporting my entire degree through financial aid and giving me the space to build discipline, confidence, teamwork, and a strong work ethic. The experiences I gained in campus societies and activities helped shape my leadership style and guided me toward the professional path I follow today. I was selected in the first Future 50 Leaders cohort by the World Economic Forum, an initiative that recognizes fifty emerging leaders globally with only three chosen from Pakistan. I serve as the elected Alumni President of my university, trusted by hundreds of graduates who voted for this role. I am also the founding curator of the Global Shapers Okara Hub which is part of...

From Namal to Cutting-Edge Research in AI and Agriculture

My academic journey began at Namal University, where I completed my BSc (Hons) in Computer Science. Namal provided me with a strong foundation in problem-solving, critical thinking, and research, shaping my passion for Artificial Intelligence and Computer Vision. I then pursued my Master's in Computer Science at Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI), where I deepened my expertise in Machine Learning and Deep Learning. The rigorous academic environment and exposure to research challenges further refined my skills, paving the way for my PhD at the University of Regina, Canada. Currently, I am a doctoral researcher in the Faculty of Engineering and Applied Science, focusing on Computer Vision, Deep Learning, and Precision Agriculture. My research aims to leverage AI-driven solutions to enhance crop monitoring, disease detection, and yield prediction, contributing to the advancement of sustainable agriculture. Namal instilled in me the resilience, adapta...

Message for Aspiring Scholars at Namal

To the students at Namal: Dream big, stay curious, and never stop learning. Research is a journey of continuous exploration, and the challenges you face today will shape the researcher you become tomorrow. Stay committed to your goals, embrace new opportunities, and always strive for excellence. For those interested in my research contributions, you can explore my work on Google Scholar Nisar Ali I am proud to be part of Namal's growing community of scholars and researchers, and I look forward to seeing the next generation of Namal alumni making a global impact. Best regards, Nisar Ali

From Namal to Tampere: A Journey of Perseverance and Opportunity

From Namal to Tampere: My Journey on a 100% Scholarship From a small university in Pakistan to one of Europe's top 50 universities—my journey has been fueled by hard work, perseverance, and the strong foundation I built at Namal. As a gold medalist in Electrical Engineering, I turned my ambition into reality by securing a 100% scholarship for my master's at Tampere University, Finland. How Namal Shaped My Success Strong Academic Foundation – The rigorous coursework at Namal prepared me for global competition. Research & Projects – The projects I completed at Namal strengthened my profile. Mentorship & Guidance – Professors encouraged me to apply for international opportunities. Problem-Solving Mindset – Namal taught me to think critically and tackle real-world challenges. Key Lessons for Namalites Dream Big, Work Hard – Your background doesn't define you; your effort does. Utilize Namal's Resources – Engage in research and hands-on projects. Seek Guidance & Network – Learn from those w...

From Rooftops to CloudOps: A NAMALite's Journey to Building Global Infrastructures

Coming from a small village where even basic internet was a luxury, I never imagined I'd be managing multi-million-dollar cloud infrastructures across the globe. During my final year project (FYP) in June 2021, COVID-19 had pushed us all back to our homes. I still vividly remember delivering my presentation standing on our rooftop under the blazing sun, just to get stable internet. That was the reality I started from. After graduating from NAMAL, I faced my fair share of rejections while applying to companies. But I never gave up. Eventually, I secured a spot in a two-month Cloud and DevOps Engineering training program. I worked hard, Alhamdulillah, topped the batch, and even won awards for outstanding performance. This opened doors for me. I joined Xgrid, where I spent three transformative years. In 2023-24, I was recognized as the Top Performer in the DevOps Department. During this time, I also earned multiple certifications—AWS Advanced Networking Specialty, AWS Developer Associate,...

Journey From Namal (Dhoke Mangwal) to Europe

"Compromise for your dreams but never compromise on your dreams" Imran Khan. Being from a pioneer batch it's an honour to become the first PhD of Namal University. I got my PhD back on 19th September 2022 from the University of L'Aquila Italy (fully funded scholarship) in Applied Data Sciences. In this whole journey, Namal played a vital role in achieving this milestone because the foundation stone was this institute. Nowadays working as a Sr. Automation Engineer in MSC Technology Italy (a leading company in the shipping industry).

Namal to New Horizons: A Multitasking Engineer's Odyssey at METU

"Embracing challenges outside our comfort zone often propels us toward greatness." With this belief as my guiding star, I transitioned from Namal to Middle East Technical University (METU) to pursue a Master's in Electrical & Electronics Engineering on a prestigious scholarship. As a Graduate Teaching Assistant and Research Assistant, I navigate the intersection of instruction and innovation, delving into deep learning, pattern recognition, and computer vision. Each challenge serves as a pathway to academic distinction, guided by the invaluable lessons and foundation provided by Namal.

Innovating the Future with AI and Big Data

Pushing the boundaries of artificial intelligence and big data innovation at Namal University Mianwali

About CAID

The Centre for AI & Big Data (CAID) is a leading research hub that pushes the boundaries of artificial intelligence and big data innovation. Our mission is to drive cutting-edge research, foster creative solutions, and cultivate expert talent in these transformative technologies. Through our work, we aim to drive economic growth, improve lives, and shape the future of AI and big data. Vision To empower individuals and organizations through cutting-edge AI and Big Data solutions, and to position Pakistan as a global leader in these fields. Mission To create a vibrant ecosystem where AI and Big Data are seamlessly integrated into society, driving economic growth and addressing societal challenges.

Vision

To empower individuals and organizations through cutting-edge AI and Big Data solutions, and to position Pakistan as a global leader in these fields.

Accelerate Your Ideas with Supercomputing

Center for AI and Big Data (CAID) is presenting a golden opportunity to get hands-on experience in using High-Performance Computers (HPC) for efficient software development aimed at solving national and international real-world problems. Learn how to secure national and international research funding, as well as opportunities for higher education and academic or industrial collaborations.

Prof. Dr. Tassadaq Hussain was honored to be the Guest of Honor and Invited Speaker at Innovative Lyallpur – The University of Faisalabad. He shared insights on the role of High Performance Computing (HPC) in driving the knowledge economy within entrepreneurial universities. Engaging discussions with university leaders and industry experts sparked new ideas and collaborative project ventures.

Full Stack Ecosystem for Processor Based Chip Design

Namal University Mianwali, successfully hosted Summer School on "Full Stack Ecosystem for Processor Based Chip Design." The event saw the enthusiastic participation of over 45 individuals from diverse backgrounds, including academia, industry, and research and government institutes. Summer school on RISC-V open source ecosystem will create an impact on the society by strengthening the linkages of academia and industry and by enhancing the industrial development and sustainable economic growth using the open source technologies. A notable highlight of the school was the presence of CEO AQL Tech Solutions Mr. Jafar Safdar, the Director General of the NESCOM. Complementing this distinguished lineup, Prof. Tassadaq Hussain and Ms. Naureen Shaukat from the Namal University Mianwali, Dr. Wladek Grabinski fron ETH Zurich Switzerland and expert speakers including Dr. Ali from UIT Institute and CEO Khursheed Fans shared their insights and knowledge. The summer school served as a pivotal platfor...

School on Supercomputing and Parallel programming

Namal University, Mianwali, successfully hosted Pakistan's 1st Summer School on "Supercomputing for AI and Big Data Applications." The event saw the enthusiastic participation of over 60 individuals from diverse backgrounds, including academia, industry, and research. This summer school will create an impact on the society by strengthening the linkages of academia and industry and by enhancing the industrial development and sustainable economic growth. A notable highlight of the school was the presence of Dr. Qaisar Ahsan, the Director General of the AI Technology Center Islamabad, who graced the occasion as the chief guest speaker. Complementing this distinguished lineup, Engr. Muhammad Usman from the Barcelona Supercomputing Center and expert speakers from Forbmax.AI and the New Zealand Center of Chiropractic shared their insights and knowledge. The summer school served as a pivotal platform to emphasize the significance of AI and engage in discussions concerning various supercomputi...

Summer School on RISC-V Embedded Systems for Industrial Applications

Namal Centre for AI & Big Data has successfully completed a 16-day "Summer School on RISC-V Embedded Systems for Industrial Applications." This summer school featured 20 sessions led by 10 trainers, including national and international experts from academia and industry. Over 56 participants, including 20 professionals from government, industry, and academia, and 30+ students from local universities, attended the summer school.

Real-Time High-Speed Seed Sorting System - Center of AI and Big Data

https://caid.namal.edu.pk/pages/real-time-high-speed-seed-sorting-system

Real-Time High-Speed Seed Sorting System

FPGA-accelerated edge computing for deterministic multi-camera grain inspection and actuation — engineered for industrial-grade sorting at scale. Explore System View Research

Vision & Sensing

Multi-stream 4K at up to 100 FPS with GMSL, MIPI, and DVP camera interfaces. Synchronized wide-coverage arrays for full-lane inspection across any configuration.

FPGA Processing Pipeline

Parallel hardware acceleration powers histogram classification and object recognition — achieving ~10 ms detect-to-eject with zero OS jitter or scheduling delay.

Deterministic Performance

Fixed-cycle FPGA logic delivers timing predictability critical for aligning pneumatic ejection actuators precisely with high-speed conveyor dynamics.

Power & Efficiency

1.79 W dynamic power enables continuous 24/7 operation while keeping energy costs minimal — built for always-on production environments.

Scalable Camera Integration

Flexible from compact single-lane to wide multi-lane deployments. Configure camera count and placement without modifying core processing logic.

Edge & Industrial Integration

Fully on-site — no cloud dependency. Low-latency control signaling for synchronized ejection actuators, scalable to complete Industry 4.0 production lines.

Trainings - 2026 - Center of AI and Big Data

https://caid.namal.edu.pk/pages/trainings-2026

Hardware-Software Co-Design for AI Accelerators and Compilers on RISC-V Platforms

Register Now

Course Objective

This course aims to equip students with the knowledge and skills required for end-to-end hardware–software co-design on open RISC-V platforms, with a strong focus on AI/ML workloads. Students will build a solid foundation in computer architecture, digital design, and SoC integration with open-source RISC-V hardware while training in the design and implementation of custom AI accelerators, including integration into full RISC-V SoC prototypes using LiteX and FPGA platforms. The course provides hands-on experience in low-level programming, including bare-metal drivers, Linux kernel modules, and user-space interfaces for hardware accelerators. Participants will develop expertise in compiler toolchains and MLIR-based frameworks, enabling them to extend compilers, add intrinsics, and design accelerator-specific MLIR dialects. Through practical deployment of AI/ML applications on specialized open hardware using runtime frameworks such as IREE, TVM, and TensorFlow Lite, the course creates a s...

Course Outcomes

Upon completion of this course, students will demonstrate familiarity with the complete hardware/software stack – from RISC-V CPU microarchitecture and SoC buses to operating systems, drivers, and compilers. They will be able to design, implement, and integrate custom AI accelerators into RISC-V SoCs and validate them on FPGA platforms, while developing and testing bare-metal HALs, Linux kernel drivers, and user-space APIs to control accelerators. Students will extend LLVM/Clang and MLIR toolchains with custom instructions, intrinsics, and dialects, enabling compiler-level optimization for specialized hardware. They will deploy and optimize AI/ML workloads (e.g., CNNs, RNNs, transformers) on RISC-V + accelerator platforms using IREE/MLIR and runtime frameworks, while analyzing and evaluating performance, scheduling, and memory trade-offs for AI inference across CPU and custom hardware backends. Finally, students will contribute to industry-relevant open-source projects, CI pipelines, a...

Course Modules

Module 1: Foundations of RISC-V and Digital Design ▼ 1.1 Computer Architecture Basics 1.2 RISC-V ISA & Microarchitecture 1.3 Computer architecture in C++ 1.4 Digital Logic Design in Verilog 1.5 SoC Buses and Interconnects (AXI/AHB/TileLink) 1.6 Memory Hierarchy and Addressing in SoCs 1.7 Intro to LiteX SoC Framework Module 2: Accelerator Design & Integration (Hardware Level) ▼ 2.1 Accelerator Development Hardware & Software 2.2 Integration via Standard Interfaces 2.3 Memory-Mapped I/O & Address Allocation 2.4 SoC Build and Peripheral Integration Module 3: Software Stack Development (Drivers and OS Integration) ▼ 3.1 Bare-Metal Drivers and HAL 3.2 C/C++ for Hardware Control 3.3 Integrating Peripherals into Boot/BIOS 3.4 Linux Kernel Module Development 3.5 Device Tree and Driver Binding 3.6 User-Space Access (mmap/ioctl/sysfs) 3.7 Testing and CI Practices Module 4: Foundations of AI/ML Workloads and Offloading Strategies ▼ 4.1 ML and AI Basics for Edge Devices 4.2 Real-Time and Streaming...

Module 1: Foundations of RISC-V and Digital Design

▼

1.1 Computer Architecture Basics

1.2 RISC-V ISA & Microarchitecture

1.3 Computer architecture in C++

1.4 Digital Logic Design in Verilog

1.5 SoC Buses and Interconnects (AXI/AHB/TileLink)

1.6 Memory Hierarchy and Addressing in SoCs

1.7 Intro to LiteX SoC Framework

Module 2: Accelerator Design & Integration (Hardware Level)

▼

2.1 Accelerator Development Hardware & Software

2.2 Integration via Standard Interfaces

2.3 Memory-Mapped I/O & Address Allocation

2.4 SoC Build and Peripheral Integration

Module 3: Software Stack Development (Drivers and OS Integration)

▼

3.1 Bare-Metal Drivers and HAL

3.2 C/C++ for Hardware Control

3.3 Integrating Peripherals into Boot/BIOS

3.4 Linux Kernel Module Development

3.5 Device Tree and Driver Binding

3.6 User-Space Access (mmap/ioctl/sysfs)

3.7 Testing and CI Practices

Module 4: Foundations of AI/ML Workloads and Offloading Strategies

▼

4.1 ML and AI Basics for Edge Devices

4.2 Real-Time and Streaming ML

4.3 Large Language & Vision-Language Models (LLMs/VLMs)

4.4 Model Deployment Frameworks

4.5 Scheduling and Memory Management

4.6 Profiling and Optimization

Module 5: Compiler Toolchains & MLIR for Accelerators

▼

5.1 RISC-V Toolchain Internals

5.2 Adding Custom Instructions/Intrinsics

5.3 MLIR Dialect Design for the Accelerator

5.4 Integration with AI Compiler Stacks (IREE/TVM)

5.5 Compiler Optimizations for Accelerator Utilization

5.6 Resource Awareness in Compilation

Module 6: System Prototyping Projects

▼

6.1 SoC Bring-up on FPGA (Hello World)

6.2 Integrate Custom Accelerator

6.3 Driver Development and Testing

6.4 Compiler and Toolchain Integration

6.5 Deploy an AI Model on the Accelerator

6.6 Evaluation and Presentation

About

Chairman's Message Rector's Message Vision and Mission Core Values The Namal Story Namal Knowledge City Board of Governors Senior Management Team HEC Recognition Policies

Chairman's Message

If we are to have a balanced society, people must be provided with equal opportunities to grow and prosper in life. Availability of quality higher education creates such opportunities. If we make higher education available and affordable for our talented youth, it will lay the foundation for a vibrant and growing society enabling us to stand amongst the leading nations. Namal University Mianwali is exactly that kind of equal opportunity for the marginalized rural youth. I am under no illusion that it is a huge challenge to set up a center of excellence in such a remote location. It will require huge amount of funds to make it a university of international standards. I want to see more than half of the students in the university coming from less privileged backgrounds benefiting through scholarships, who, in our present elitist education system, cannot dream of having access to high quality education. With a diverse student body, majority of them being supported through financial assist...

Departments

Academic Departments Department of Electrical Engineering Department of Computer Science Department of Business Studies Department of Mathematics Administrative Departments Office of the Registrar Office of the CoE Office of the Treasurer Academic Calendar Student Handbook ORIC Quality Enhancement Cell Placement Center

Overview

Computer Science concentrates on the theoretical foundations of computation and computer technology. It incorporates ideas from many other disciplines, including mathematics, engineering, humanities, management sciences and graphical design and has a close affinity with electronic communications as illustrated by the Internet and World Wide Web. The aim of the program is to provide you with a sound grounding in the fundamentals of computer software development (programming) and the tools and applications that modern computer scientists use.

Vision

To emerge as a center of excellence in Computing and technology through quality education and impactful research.

Mission

The department of Computer Science (CS) is committed to the following goals: To provide quality education and research opportunities. To empower graduates to take on local and global societal challenges. To instill in them the ability to be lifelong learners, critical thinkers, effective communicators, and people with strong moral values.

Program Objectives

The aim of the program is to provide you with a sound grounding in the fundamentals of Computing. The objective of the program is to groom students in such a way that they can: PO-1 Inculcate computing knowledge, analytical skills and creativity to design optimal solutions. PO-2 Instill effective communication and interpersonal skills along with leadership qualities. PO-3 Foster moral and ethical values with a keen sense of societal responsibility and life-long commitment to learning.

Graduate Attributes

To be eligible for the award of the undergraduate degree, students will be able to demonstrate following skills: GA-1 Academic EducationTo prepare graduates as computing professionals. GA-2 Knowledge for Solving Computing Problems Apply knowledge of computing fundamentals, knowledge of a computing specialization, and mathematics, science, and domain knowledge appropriate for the computing specialization to the 16 abstraction and conceptualization of computing models from defined problems and requirements. GA-3 Problem Analysis Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines. GA-4 Design/ Development of Solutions Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, ...

Overview

The Department of Electrical Engineering was established to produce quality engineers with the acquired skill set to meet the market demand while offering an undergraduate program of BS in Electrical Engineering. The department has highly qualified faculty with industrial and academic experience and is equipped with state-of-the-art laboratories. The department has a vibrant research environment in which our students are fully immersed. Our curriculum provides students with knowledge of engineering, physical sciences, written and oral communications, humanities and social sciences providing them an excellent foundation to be a valuable member of society. The curriculum is tailored to meet industrial demand for which we are offering electives in Artificial Intelligence, Machine Learning, Integrated Circuits, and Internet of Things (IoT), Renewable Energy Systems, among others.

Events and Insights - Electrical Engineering Department

The Electrical Engineering Department at Namal University Mianwali is committed to provide excellence in education, research, innovation, embedding technical expertise and critical thinking among students. Through academic rigor, industry collaborations, and vibrant extracurricular activities, the department empowers students to become future-ready engineers and leaders. 28 Jan 2026 News Join us at NAMAL TECH Expo 2026 31 Dec 2025 News Students Secure Top Positions at ROBO FIESTA 8.0 30 Dec 2025 Workshop International Guest Lecture Enhances OOP Learning 24 Dec 2025 News Alumni Talk Series: From Graduation to Design Verification Engineer 09 Dec 2025 News Namal University FYP Among Finalists at FICS 2025 29 Nov 2025 News Fiteligence: Real-Time AI-Driven Workout Assistant - Top Rated FYP 2025 26 Nov 2025 News Expert Talk on Synthetic Medical Data Using AI at Namal University 27 Oct 2025 News Namal University Hosts Industrial Advisory Board Meeting to Strengthen Academia-Industry Linkages ...

Vision

The Electrical Engineering Department aims to become a center of excellence in teaching and application-oriented research.

Mission

To produce technically competent graduates, excellent communicators, self-accountable, respectful to others, passionate readers, willing to take on challenges, and trustworthy. Further, the department is committed to carry out application-oriented research in technology towards socio-economic development of the rural areas of Pakistan.

Program Educational Objectives

PEO-1: Achieve high standards of excellence in both academia and industry through knowledge, exploration, design, and analysis using innovative tools. PEO-2: Actively tackling issues of environment, society and moral principles as an electrical engineer. PEO-3: Take on leadership position in organization through effective management, teamwork, communication and continuous learning.

Program Learning Outcomes

To be eligible for the award of the undergraduate degree, students will be able to demonstrate following skills: PLO-1: Engineering Knowledge: An ability to apply knowledge of mathematics, science,engineering fundamentals and an engineering specialization to the solution of complex engineering problems. PLO-2: Problem Analysis: An ability to identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences. PLO-3: Design/Development of Solutions: An ability to design solutions for complex engineering problems and design systems, components or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations. PLO-4: Investigation: An ability to investigate complex engineering problems in a methodical way including literature survey, design and conduct of experiments, analys...

Overview

BS Mathematics is a 4-year degree program accredited by Higher Education Commission (HEC). The overall purpose of this program is to serve as the foundation of advancements in the areas of mathematics and to introduce the students with the fundamentals of the core mathematics to prepare them for the emerging future of the mathematics area. However, we aim to set benchmark in producing the most efficient and proficient graduates.

Vision

To provide an environment where students can learn analytical and quantitative reasoning skills and promote Mathematical thinking as a significant part of human thought.

Mission

The department of Mathematics is committed to the following goals: Develop skills and abilities to discuss and implement mathematical ideas effectively to solve practical problems. Impart the capacity to become an independent learner, critical thinker, and problem solver who can make effective contribution to the society. Provide an ideal environment for the continued growth of faculty members with the meaningful research.

Program Educational Objectives

Objectives of the BS (Math) programme are: To develop the ability to its students to discuss mathematical ideas effectively and to use these skills to solve practical problems. To impart the capacity to become an independent learner, critical thinker and problem-solver. To provide an ideal environment for the continued growth of faculty members with meaningful research.

AgriFusion 2025 Highlights Multidisciplinary Innovations for a Sustainable Agricultural Future

AgriFusion 2025: Multidisciplinary Technologies and Innovations for Sustainable Agriculture — a National Symposium on Agricultural Innovation organized by the Office of Research, Innovation, and Commercialization (ORIC) at Namal University, Mianwali, held on Saturday, 31st May 2025. AgriFusion 2025 brought together renowned keynote speakers from academia and industry for a dynamic exchange of ideas and to foster collaboration between academia and the agri-industry. The event featured student-led agricultural projects, a faculty idea pitch competition on research and innovation in agriculture and allied fields, panel discussions addressing local challenges and global agricultural perspectives, and industry stalls showcasing cutting-edge agri-technologies.

Alumni Talk Series: From Graduation to Design Verification Engineer

Our Alumni Talk Series featured Engr. Muhammad Waseem Abbas (Class of 2023), Design Verification Engineer at 10xEngineers, delivered an engaging and insightful session to our students. He shared an industry-focused roadmap to Design Verification, covering SystemVerilog, UVM, IP verification, and Out-of-Order RISC-V core verification, along with practical guidance on skill building, career readiness, and interview preparation. This session marks another strong step toward bridging academia with Pakistan's growing VLSI and semiconductor industry.

Farewell Party of the Class 2025

It's always one of the most touching moments for the faculty, management and the junior students to bid farewell to Namal's very own would-be graduates. The class of 2026, as per our tradition, arranged an extraordinary farewell party/dinner for the outgoing class of 2025. The students of third year and the final year students showed an awesome bondage. The management won appreciation for arranging the exceptional and befitting farewell for the class 2025. Excitement was its peak, but each one became emotional because of the inevitability of departure. God bless you, Class 2025!

Fiteligence: Real-Time AI-Driven Workout Assistant - Top Rated FYP 2025

A top-rated Final Year Project, awarded by the Head of Electrical Engineering and FYP Supervisor Ms. Zulaikha Kiran at the 3rd Convocation of Namal University Mianwali (29 November 2025). The project addresses workout-related injuries caused by incorrect exercise form by providing real-time, AI-driven feedback using Computer Vision. Leveraging MediaPipe BlazePose for pose estimation, normalized joint angles, and an LSTM-based deep learning model, the system accurately detects improper movements and delivers instant corrective guidance through a user-friendly web platform, promoting safer and more effective fitness training.

Students Secure Top Positions at ROBO FIESTA 8.0

Achievement Highlight | Namal University Proud moment for Namal University as our students secured top positions at ROBO FIESTA 8.0, organized by HITECH University, Taxila. Competing against teams from across the country, they demonstrated exceptional technical skills, teamwork, and innovation. Congratulations to our students on this outstanding achievement!

MR. ABDUL RAFAY

Lecturer

Department of Computer Science abdul.rafay@namal.edu.pk

Summary

Abdul Rafay is a lecturer at the department of Computer Science. He did his MS in Computer Science from FAST NUCES, Islamabad. The title of his thesis was "Paraphrasing of Urdu Text using NLP". Previous to that, he has completed his BSc (Hons) in Computer Science from University of Bradford, United Kingdom. He is a passionate teacher. He has also been working as a Teaching Assistant at FAST NUCES, Islamabad during his MS tenure. His research interests focus on Machine Learning (NLP) and Game Development.

Academic Background

MS in Computer Science (Paraphrasing of Urdu Text using Natural Language Processing) FAST NUCES, Islamabad, Pakistan 2022 BSc (Hons) in Computer Science (Martian Survivor (Game Development Project)) University of Bradford, United Kingdom 2018

Experience

Visiting Lecturer University of Mianwali, Mianwali 02-Feb-2022 - 05-Mar-2023

Courses

Quantitave and Computational Reasoning Design and Analysis of Algorithms Object Oriented Programming (OOP) Programming Fundamentals

Visit Namal

DR. SAMI ULLAH KHAN

Associate PROFESSOR

Department of Mathematics samiullah@namal.edu.pk

Summary

Dr. Sami Ullah Khan is an Associate Professor at the Department of Mathematics, Namal University Mianwali Pakistan. He earned his Ph.D. in applied mathematics from International Islamic University, Islamabad, Pakistan in December 2016. He has worked as an assistant professor in COMSATS university for six year.He has published 560 research articles with impact factor 2500 plus. He has been placed in top 2% scientists in last three-years. Dr. Khan has more than 15000 research citations. He is reviewer of more than 90 impact factor journals. Dr. Khan is the guest editor of four impact factor journals. Dr Khan has awarded best researchers award from NAMAL university in 2023 and 2024. Currently he is involved with more than 30 active national and international research groups. His research interests include non-Newtonian fluids, nanofluids, fluid flow in porous , bioconvection flow, nanofluids , analytical techniques and numerical analysis.

Academic Background

PhD (Mathematics) International Islamic University, Islamabad, Pakistan 2016 MS (Mathematics) International Islamic University, Islamabad, Pakistan 2011 MSc (Mathematics) International Islamic University, Islamabad, Pakistan 2009

Experience

Associate Professor Namal University 01-Mar-2023 - continue Assitant Professor COMSATS University Sahiwal Pakistan 08-Feb-2017 - 20-Feb-2023

Honours and Awards

2% Scientists University of Stanford 2% scientists list 09-Mar-2022 Indigenous Scholarship Merit based PhD scholarship 01-Jun-2012

Journal Publications

A case study on enhanced thermal transport of radiated hybrid ferro-nanofluid ($Fe_3O_4/CoFe_2O_4$-$NiZnFe_2O_4/MnZnFe_2O_4$) with finite speed thermal propagation 25-Oct-2025 Case Studies in Thermal Engineering Volume 76, December 2025, 107279 Comparative study of thermal response for tetra nanofluid through a vertically oriented needle device inspired by combined convection and porous media 21-Oct-2025 Scientific Reports volume 15, Article number: 36506 (2025) Numerical exploration for

bioconvective nanofluid flow towards a rotating surface with chemical reaction and radiative effects 14-Oct-2025 Partial Differential Equations in Applied Mathematics Volume 16, December 2025, 101310 Performance of triangular fin device coated with (SiC–Co3O4)/diathermic nanolubricant inspired by convective and radiation conduction using AI driven approach 06-Oct-2025 Scientific Reports volume 15, Article number: 34761 (2025) Nanoparticles diameter based thermal conductivity aspects for thermal application in nano...

Journal Publications

Voice pathology identification using mel spectrogram features and deep learning 26-Jul-2025 Signal, Image and Video Processing Principal Component Analysis (PCA) and feature importance-based dimension reduction for Reference Evapotranspiration (ET) predictions of Taif, Saudi Arabia 02-Jul-2024 Reference Evapotranspiration (ET) is fundamental to irrigation water management but challenging to calculate due to requirements of many weather parameters for standard Penman–Monteith (PM) method of Reference Evapotranspiration (ET) calculation. Many machine-learning approaches were proposed for the simplification of Reference Evapotranspiration (ET) predictions. There is also a need to explore the possibilities of daily Reference Evapotranspiration (ET) predictions for the desert climate of Taif, Saudi Arabia. The study proposed machine learning-based daily Reference Evapotranspiration (ET) predictions of Taif, Saudi Arabia. The weather data of Taif, from 2001 to 2023 is used to train and...

Summary

I have completed my PhD in Islamic Studies from University of Karachi, Karachi during 2020.[redacted]. My PhD dissertation was also on a unique and contemporary topic. The title of thesis was "[redacted]". Previous to that, I have completed my M.A in Islamic Studies from Federal Urdu University of Arts, Science & Technology, Karachi. I also completed my Sharih Qualification (Dars-e-Nizami), from Jamia Darul Uloom Karachi, under the supervision of Wifaq ul Madaris Al-Arabia Pakistan and Specialization in Islamic Jurisprudence (Mufti Course), from Jamia tur Rasheed Karachi. I have worked as senior lecturer in Islamic Institute at Karachi. Then I worked as lecturer of Islamic Studies at Air University Islamabad (Multan Campus) in 2021. Now, I am currently working as Assistant Professor at Namal University Mianwali, Pakistan. I have a keen teaching interest in courses related to Islamic Studies, Quranic Studies and Hadith & Fiqh. Moreover...

Academic Background

PhD (The role of Ijtihad's theory in the solution of current problems and difficulties of Muslims (In Urdu) Musalmanon ky Asri Masa'il o Mushkilat ky hl me Nazria-e-Ijtihad ka kirdar) University of Karachi, Karachi 2020 M.A (Islamic Studies) Federal Urdu University of Arts, Sciences & Technology Karachi 2018 M Phil (The role of Ijtihad's theory in the solution of current problems and difficulties of Muslims (In Urdu) Musalmanon k Asri Masa'il o Mushkilat k hl me Nazria-e-Ijtihad ka Kirdar) University of Karachi, Karachi 2016 Specialization in Fiqh (Mufti Course) (Fatwas on various issues and Tahrijats (About one hundred and twenty-five Fatwas and more than twenty Takhrijats)) Jamia tur Rasheed, Ahsan Abad, Karachi 2014 B.A (Islamic Studies) Bahauddin Zakaria University, Multan 2012 Shahadat tul Almiyya (Derse Nizami Course) (Explanation of Ahadiths) Jamia Darul Uloom Karachi 2011

Experience

Assistant Professor 1. Namal University Mianwali 24-Jan-2022 - continue Lecturer 2. Air University Islamabad (Multan Campus) 08-Mar-2021 - 12-Jul-2021 Senior Lecturer 3. Jamia tul Anwar, Gulshan-e-iQbal Karachi (An Islamic Institute) 08-Aug-2014 - 31-May-2022

Honours and Awards

First Position Awarded I secured the first position in specialization in da'wah for the second time as well as first time. 22-Oct-2013 First Position Award I have gotten first position twice, second position once and third position once in Jamia Darul Uloom Karachi. 15-Sep-2012

Journal Publications

The Contemporary Significance of the Qur’anic Exegetical Contents in Reformative Sermons: An Analytical Study Based on" Khutbat E Usmani" By Sheikh Muhammad Taqi Usmani 31-Oct-2025 Islamic scholars, in addition to their written works, have also elucidated the subtleties, nuances, and profound meanings of the Qur'an through their sermons and public discourses. These sermons often contain exegetical insights that are seldom found in traditional tafsir (Qur'anic exegesis) literature. Through these interpretations, scholars have not only rendered the meanings of the Qur'an accessible to the general public but have also addressed contemporary intellectual, ethical, and socio-cultural challenges. Within their discourses, critical issues such as

human rights, freedom of expression, women's rights, social justice, international relations, education and research, and economic systems have been explored in light of Qur'anic guidance. Transplantation in Modern Times: Its Importance and Solutions ...

MS. ASIYA BATOOL

Lecturer

Department of Computer Science 173 asiya.batool@namal.edu.pk

Summary

Asiya Batool is a computer science professional who earned her Master of Science degree in Computer Science from the prestigious Pakistan Institute of Engineering and Applied Sciences (PIEAS) in 2021, following the completion of her Bachelor's degree in Software Engineering from the University of Sargodha in 2017. Her industry experience includes working as a Web Developer at INFOSYS Institute of Information Technology in Sargodha in 2015, as well as serving as a graphic designer at QodIT. In 2017, she began her career in academia, teaching at G.C.W. Mianwali for two years. She also worked at the University of Mianwali as a Visiting Lecturer (Computer Science) from 2021 to 2023. Currently, She works as a Lecturer in the Department of Computer Science at Namal Mianwali, where she brings her considerable expertise in support of educational and research activities.

Academic Background

MS Computer Science (Identity Based 3D Face Reconstruction) PIEAS, Islamabad 2021 BS Software Engineering (3D Game Development) University of Sargodha, Sargodha 2017

Experience

Visiting Lecturer CS University of Mianwali 22-Nov-2021 - 06-Mar-2023

Journal Publications

A Survey of Deep Learning Techniques for the Analysis of COVID-19 and their usability for Detecting Omicron 13-Feb-2022 The Coronavirus (COVID-19) outbreak in December 2019 has become an ongoing threat to humans worldwide, creating a health crisis that infected millions of lives, as well as devastating the global economy. Deep learning (DL) techniques have proved helpful in analysis and delineation of infectious regions in radiological images in a timely manner. This paper makes an in-depth survey of DL techniques and draws a taxonomy based on diagnostic strategies and learning approaches. DL techniques are systematically categorized into classification, segmentation, and multi-stage approaches for COVID-19 diagnosis at image and region level analysis. Each category includes pre-trained and custom-made Convolutional Neural Network architectures for detecting COVID-19 infection in radiographic imaging modalities; X-Ray, and Computer Tomography (CT). Furthermore, a discussion is made on ...

DR. AZHAR RASOOL

Assistant Professor

Department of Business Studies 122 azhar.rasool@namal.edu.pk

Summary

Dr. Azhar holds a Ph.D. in Agribusiness with dual affiliations from the University of Agriculture Faisalabad, Pakistan, and the University of Florida, USA. He has worked for numerous organizations, such as ADB, ICARDA, and USAID projects, for eight years as a teacher and researcher. He worked in Homestead, Miami, for the USDA during his fellowship in the United States. Mr. Azhar's research interests include value chain governance, the dynamics of the evolving consumer market, the interactions between academia and industry, and the difficulties faced by smallholders in particular. He delivered research presentations at multiple international symposiums held at AAPCEC in Ethiopia, IFAMA in New Zealand, Spain, USA and Brazil. His research study was published in a distinguished publication produced by Cambridge University.

Academic Background

Ph.D (Agribusiness) (Value chain governance and growers' sustainable performance) University of Agriculture Faisalabad / UFL USA 2024 MBA (3.5 Years) Agribusiness Management (Business Education and Academia-Industry Linkages) University of Agriculture Faisalabad 2016

Honours and Awards

Scholarship Recipient by Bayer Crop Sciences for Research Presentation at IFAMA-2024 World Conference, Spain" Scholarship awarded by the Bayer Crop Sciences to present the research paper at the IFAMA-2024 World Conference in Spain. 01-Feb-2024 Travel Grant from TREC, UFL, USA Awarded a travel grant by the Tropical Research and Education Center, the University of Florida, United States of America to present the research paper at the IFAMA-2023 World Conference in New Zealand. 05-Mar-2023 Awardee of IRSIP Fellowship for UFL, USA Awarded a 6-months fellowship (Dec 2022 to May 2023), by the HEC, Pakistan under the IRSIP at the University of Florida, United States of America 12-Dec-2022 Recipient of Laptop under the Prime Minister's Youth Initiative Awarded Laptop from Govt. under the Prime Minister's Youth Initiative 30-May-2017 Merit Scholarship holder in MS/MBA Agribusiness Management Merit Scholarship holder in MS/MBA Agribusiness Management due to higher the CGPA at the Institute of Bu...

MR. M. RAMZAN SHAHID

Lecturer

Department of Computer Science 127 ramzan.shahid@namal.edu.pk

Summary

Ramzan Shahid Khan is a Lecturer at the Department of Computer Science. He did his MS in Computer Science from GIKI, Swabi. The title of his thesis was "Depression Detection from Urdu Corpus Using Deep Learning Approach". Previous to that, he has completed his BS in Computer Science from Namal College Mianwali. Before joining Namal, he has been working as a Lecturer at CUST, Islamabad. His research interests focus on Natural Language Processing, Deep Learning, and Data Mining

Academic Background

MS in Computer Science (Depression Detection from Urdu Corpus Using Deep Learning) Ghulam Ishaq Khan Institute of Engineering Sciences and Technology 2022 BSc (Hons) in Computer Science (Forecasting Bition’s Price using Artificial Neural Networks (DNN & RNN)) University of Bradford 2018

Experience

Lecturer Namal University, Mianwali 25-Sep-2023 - continue Lecturer Capital University of Science and Technology, Islamabad 28-Mar-2023 - 21-Sep-2023

Courses

MR. AMMAR AHMAD

Lab Engineer

Department of Computer Science ammar.ahmad@namal.edu.pk

Summary

Ammar Ahmad Khan, born on July 3, 1997, in Mianwali, Pakistan, is a passionate computer scientist specializing in Artificial Intelligence. He holds a BS in Computer Science from the University of Sargodha (UOS) and an MS Computer Science from the University of Lahore (UOL). With a career spanning diverse roles, he has made significant contributions to education and technology. From his early days as a District Coordinator at LUMS University to his role as a Credit Officer at MCB Bank and his current position as a Lab Engineer at

NAMAL University, Ammar's journey reflects his unwavering commitment to excellence and his enduring dedication to the field of AI.

Academic Background

MS in Computer Science (Classification of Colon Cancer using Deep Learning Techniques on Histopathological Images) University of Lahore 2022 BS in Computer Science (Seed Snap) University of Sargodha 2019 Ph.D. in Computer Science (Computer Vision & Medical Imaging Researcher) HITEC University in progress

Experience

ASSISTANT PROFESSOR

Department of Mathematics zia.rehman@namal.edu.pk

Summary

Currently, I am working as an Assistant Professor of Physics at the Department of Mathematics, Namal University in Mianwali, Pakistan. I earned my PhD (Applied Physics) in 2018 from Universiti Teknologi PETRONAS, Malaysia. Formerly I served as a lecturer for six years at Federal Urdu University of Arts, Science and Technology, Islamabad. I have over 15 years of experience in teaching and conducting research at the university level in the fields of Applied Physics and Material Science. I have published 30 papers with an impact factor of 90+ and more than 306 citations, as well as 6 conference publications & invited talks at different conferences. Currently I am involved with multiple active national and international research groups. My research interests include Density Functional Theory, Material Science, Computational Condensed Matter Physics, 1D and 2D materials, Nanomaterials, CVD, heterogeneous catalysis, Photovoltaics, Hydrogen storage, Molecular dynamics, and Adsorption. I have ...

MS. SONIA SAFEER

Lecturer

Department of Computer Science sonia.safeer@namal.edu.pk

Summary

In the academic journey, Sonia Safeer has earned a Bachelor of Science degree from the Software Engineering Campus of Comsats University, Wah, and a Master of Science degree in Computer Science from Ghulam Ishaq Khan Institute of Engineering Sciences and Technology. During her master's program, she contributed as a Graduate Assistant, actively assisting with various courses. Her academic excellence was acknowledged with the award of an HEC scholarship during her undergraduate studies at Comsats University, and she received a Fully Funded scholarship from GIK Institute during her postgraduate studies. Sonia's research interests are primarily focused on the fields of Signal Processing and Feature Engineering. In the academic journey, Sonia Safeer has earned a Bachelor of Science degree from the Software Engineering Campus of Comsats University, Wah, and a Master of Science degree in Computer Science from Ghulam Ishaq Khan Institute of Engineering Sciences and Technology. Journal Publications

Metamodernism: A New Aesthetic Narrative Beyond Postmodernism. 23-Aug-2025 This paper examines metamodernism as a new aesthetic narrative that arises beyond postmodernism, while still drawing upon the legacies of both modernism and postmodernism. The discussion opens with a brief philosophical prelude on God, man, and the universe, not as a central argument but as a contextual backdrop for understanding shifts in intellectual thought. The core of the paper situates metamodernism as an oscillatory sensibility that balances sincerity and irony, belief and doubt, detachment and commitment. In contrast to the skepticism of postmodernism and the certainty of modernism, metamodernism is shown to recover meaning, emotional depth, and human interiority without abandoning critical self-awareness A research and critical review of Kaifi Azmi,s Poetry 30-Dec-2024 Kaifi Azmi, a progressive poet, was born in 1919 in the village of Majwan, Azamgarh district, subjugated India. His family was respected...

DR. AHMED SALIM

Assistant Professor

Department of Electrical Engineering 158 ahmed.salim@namal.edu.pk

Summary

Pursuing a teaching career with 2.5 years of research fellow experience conducting research on microwaves resonators targeting antennas and sensing applications. PhD thesis on "Metamaterials-inspired RF Sensors from Devices to System". Master's thesis on " Evaluation of Word Length Effects on Multi-standard Soft Decision Viterbi Decoder". BS thesis on "CQI Estimation over the Downlink of OFDMA ". Full-time teaching experience at two different universities and 1 year of experience as a Network Operation Center (NOC) engineer.

Academic Background

Ph.D. Electrical Engineering (Metamaterials-inspired RF Sensors from Devices to System) Chung Ang University, Seoul, Korea 2020 M.Sc Electrical Engineering (Linkoping University, Sweden) Evaluation of Word Length Effects on Multi-standard Soft Decision Viterbi Decoder 2011 B.Sc. Electrical Engineering (CQI Estimation over the Downlink of OFDMA) University of Engineering and Technology, Lahore, Pakistan 2007

Experience

Postdoctoral Fellow University of British Columbia, Kelowna, BC, Canada 01-Apr-2022 - 30-Mar-2023 Postdoctoral Researcher Pohang University of Science and Technology, Pohang, Korea 01-Sep-2020 - 30-Jan-2022

Journal Publications

Overcoming Barriers to Solar Energy Adoption in Pakistan: Current Status, Policy Gaps, and Institutional Reforms 01-Dec-2025 Results in Engineering Comparative Analysis of Machine Learning Models for Lung Cancer Detection Using CT Scan Images 23-Mar-2025 International Journal of Innovations in Science &

Technology Pattern reconfigurable quasi Yagi antenna with Origami inspired magic spiral cubes for dynamic indoor IoT applications 23-Feb-2025 Scientific Reports

Courses

Wireless Communication (8th semester, Spring 2026 [ongoing]) Computer Communication Networks (6th semester, Spring 2026) [ongoing]) Application of Information and Communication Technologies (1st Semester, Fall 2025) Electronic Devices and Circuits (3rd Semester, Fall 2025) Wireless Communication (8th semester, Spring 2025) Internet of Things (IoT) (8th semester, Spring 2025) Electromagnetic Theory (5th semester, Fall 2024) Computer Communication Networks (5th semester, Fall 2024) Wireless Communication (8th semester, Spring 2024) Internet of Things (IoT) (8th semester, Spring 2024) Computer Communication Networks (5th semester, Fall 2023) Signals and Systems (3rd semester, Fall 2023)

DR. KHAWAR KHURSHID

Professor

Department of Computer Science 163 khawar.khurshid@namal.edu.pk

Summary

Dr. Khawar Khurshid is an academic and a researcher in the field of Machine Learning and Computer Vision, currently holding the position of Professor in the Department of Computer Science at Namal University. Dr. Khurshid earned his Ph.D. from Michigan State University, USA in the field of Medical Image Processing using ML algorithms. Prior to joining Namal University, Dr. Khurshid served at SEECS, NUST for more than 13 years in the capacities of Assistant Professor and Associate Professor. Dr. Khurshid was also the head of the Institute of Applied Electronics and Computing at SEECS for six years. In addition to the administrative role in NUST, Dr. Khurshid has published more than 50 research papers, and has taught several different courses at the graduate, as well as undergraduate level.

Academic Background

PhD (PET/CT Image Registration for Accurate Reconstruction of PET Data) Michigan State University 2010 BE (Computer Systems Engineering) EME, NUST 2003

Experience

Professor Namal University 01-Nov-2023 - continue Associate Professor National University of Sciences and Technology 16-Nov-2019 - 20-Oct-2023 Head of Department National University of Sciences and Technology 01-Sep-2012 - 31-Aug-2018 Assistant Professor National University of Sciences and Technology 10-May-2010 - 15-Nov-2019

Honours and Awards

Faculty Exchange Fellowship Fellowship awarded by Sungkyunkwan University, South Korea for three consecutive years (2014, 2015, 2016). 01-Jul-2014 Research Enhancement Award Michigan State University 01-Sep-2009 Summer Research Grant Michigan State University 01-Jun-2009 Research Grant Department of Animal Sciences, Michigan State University 03-Sep-2007 PhD Fellowship NUST Merit based Split PhD Scholarship 23-Aug-2004

DR. UMAR FAROOQ

Associate PROFESSOR

Department of Business Studies 108 umar@namal.edu.pk

Summary

Dr. Umar Farooq is an experienced academician with a passion for teaching finance and leveraging data for analysis and visualization. Currently, he holds the position of Associate Professor at NAMAL University, Mianwali. Previously, he served as an Assistant Professor at FAST-National University of Computer & Emerging Sciences from 2015 to 2024. He also served Lahore Leads University as lecturer from 2012 to 2015. His research interests include bankruptcy prediction, fraud detection, corporate finance and Islamic Financial Products, with over 20 publications in prestigious journals. Dr. Farooq possesses expertise in various data visualization tools like Google Looker Studio and Power BI, along with advanced proficiency in programming languages like Python and R for data analysis.

Academic Background

PhD (Management Sciences) (Thesis - Prediction and Indirect Costs of Bankruptcy: A Multi-Stage Approach to Financial Distress) COMSATS University Islamabad, Lahore Campus 2020 MBA (Finance) (Thesis - Operating or Financial Distress? How much costly these are?) University of the Punjab, Gujranwala Campus 2011 BBA (Finance) University of the Punjab, Gujranwala Campus 2009

Experience

Associate Professor Namal University, Mianwali 12-Feb-2024 - continue Assistant Professor FAST - National University of Computer and Emerging Sciences 01-Sep-2018 - 10-Feb-2024 Lecturer FAST - National University of Computer and Emerging Sciences 01-Aug-2015 - 31-Aug-2018 Lecturer Lahore Leads University 01-Sep-2012 - 31-Jul-2015

DR. MUZAMIL AHMED

Assistant Professor

Department of Computer Science muzamil.ahmed@namal.edu.pk

Summary

Muzamil Ahmed holds a Ph.D. from COMSATS University Islamabad, Pakistan. He is a dedicated researcher with extensive experience in both academia and the IT industry, particularly in artificial intelligence and machine learning. His research has been published in esteemed peer-reviewed journals, including IEEE Transactions and ACM Transactions. Additionally, he is also an active reviewer for several prestigious journals, including Expert Systems (Elsevier), PLOS One, and IEEE Access. His expertise spans natural language processing, information retrieval, machine learning, and data science.

Academic Background

Ph.D. Computer Science (Semantic-aware Automated Question Answering Systems using Transformers-based Deep Learning) COMSATS University Islamabad, Wah Campus Wah Cantt, Pakistan 2024 MS Computer Science (Recognition of Violent Activities form video sequence using Deep Learning Approach) University of Lahore 2019

Honours and Awards

Gold Medalist Awarded the Gold Medal for securing the top position in MS Computer Science. 31-Aug-2019

DR. MUZAMIL AHMED

Assistant Professor

Department of Computer Science muzamil.ahmed@namal.edu.pk

Summary

Muzamil Ahmed holds a Ph.D. from COMSATS University Islamabad, Pakistan. He is a dedicated researcher with extensive experience in both academia and the IT industry, particularly in artificial intelligence and machine learning. His research has been published in esteemed peer-reviewed journals, including IEEE Transactions and ACM Transactions. Additionally, he is also an active reviewer for several prestigious journals, including Expert Systems (Elsevier), PLOS One, and IEEE Access. His expertise spans natural language processing, information retrieval, machine learning, and data science.

Academic Background

Ph.D. Computer Science (Semantic-aware Automated Question Answering Systems using Transformers-based Deep Learning) COMSATS University Islamabad, Wah Campus Wah Cantt, Pakistan 2024 MS Computer Science (Recognition of Violent Activities form video sequence using Deep Learning Approach) University of Lahore 2019

Honours and Awards

Gold Medalist Awarded the Gold Medal for securing the top position in MS Computer Science. 31-Aug-2019

DR. MUHAMMAD RAFIQ

Professor

Department of Mathematics 113 muhammad.rafiq@namal.edu.pk

Summary

Dr. Muhammad Rafiq is working in Namal University, Mianwali as Professor in the Department of Mathematics. He has earned his Ph.D in Applied Mathematics from University of Engineering and Technology Lahore. He did his first postdoc from Near East University, Türkiye and the second postdoc from Lebanese American University, Lebanon. Prof. Rafiq has 20 years of experience in university teaching. His area of research is Mathematical Modeling of Infectious Diseases Dynamics. He has published 223 research papers in reputed journals. His cumulative impact factor is more than 600. Prof. Rafiq has presented his work in 66 National and International conferences. He has been working on transmission dynamics of infectious diseases since last 15 years and is among the pioneers who started the field mathematical modeling of communicable diseases in Pakistan. He has supervised 07 Ph.D and 50 M.Phil students. His name is included in the top 2% scientists of the world for the years 2023-24 and 2024-25...

Academic Background

Post Doctorate ( ) Near East University Turkey 2023 PhD in Applied Mathematics (Numerical Modeling of Infectious Diseases Dynamics) University of Engineering and Technology Lahore, Pakistan 2017 M.Phil in Applied Mathematics (Finite Element Method for General Linear Second Order Boundary Value Problem) University of Engineering and Technology Lahore, Pakistan 2007 M.Sc in Applied Mathematics (Numerical Solutions of Non-Linear Algebraic Equations) University of Engineering and Technology Lahore, Pakistan 2004

Experience

Professor Namal Univesity Mianwali 02-Sep-2024 - continue Professor University of Central Punjab Lahore,Pakistan 01-Nov-2021 - 31-Aug-2024 Associate Professor University of Central Punjab Lahore,Pakistan 01-Mar-2019 - 31-Oct-2019 Assistant Professor University of Central Punjab Lahore,Pakistan 23-Aug-2010 - 28-Feb-2019 Lecturer University of Central Punjab Lahore,Pakistan 01-Nov-2005 - 21-Aug-2010

Honours and Awards

Best Researcher Award, Faculty of Science and Technology, UCP for year 2022 - 01-Mar-2023 Dean's Certificate for Outstanding Performance in Research for year 2019 - 23-Dec-2019 Special award for best performance in year 2006, UCP Lahore - 16-Nov-2006

Journal Publications

Modeling the impact of optimized treatment patterns on dengue transmission dynamics 29-Oct-2025 Chaos 35, 103148 (2025) Stochastic Analysis of Pine Wilt Epidemic Model With Dynamically Consistent Approximation 13-Oct-2025 Complexity, 13:4099463 (2025) Stochastic fractional order model for the computational analysis of computer virus 30-Sep-2025 Scientific Reports, 15:33951 (2025) MATHEMATICAL AND NUMERICAL INVESTIGATIONS OF FRACTIONAL STOCHASTIC EPIDEMIC MODEL 30-Sep-2025 THERMAL SCIENCE: Year 2025, Vol. 29, No. 5A, pp. 3669-3679 Analyzing optimal control techniques in a nonlinear fractional Rubella model with the Atangana–Baleanu derivative 29-Aug-2025 Computers in Biology and Medicine, 197:110954 (2025) Numerical solutions for norovirus epidemic spread: implications for public health control 13-Aug-2025 Scientific Reports, 15: 29657 (2025) Numerical modelling and stability analysis of fractional smoking model 28-Jul-2025 Computer Methods and Programs in Biomedicine Update, 8:100201 (...

DR. MUDASSAR RAZA

Professor

Department of Computer Science 187 mudassar.raza@namal.edu.pk

Summary

Dr. Mudassar Raza, Senior Member IEEE, has joined Namal University, Mianwali, as a Professor in the Department of Computer Science. He earned his Ph.D. in Control Science and Engineering with a specialization in Pattern Recognition and Intelligent Systems from the University of Science and Technology of China, Hefei, Anhui, China. He has over 18 years of teaching and research experience at both graduate and undergraduate levels at COMSATS University Islamabad, Wah campus, and HITEC University Taxila. His research areas include Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Pattern Recognition, and Parallel Programming. He has more than 150 research publications in journals and conferences of international repute. He was honored with the “National Youth Award 2008” in the “Computer Science and Information Technology” category by the Prime Minister of Pakistan on International Youth Day, 12 August 2008. He has so far supervised and co-supervised over 51 MS and...

Academic Background

Ph.D. [Doctor of Engineering In Control Science And Engineering] with specialization in Pattern recognition and intelligent systems (Automated Identification of Pedestrian’ Attributes for Behavior Analysis in Surveillance Systems by Employing Deep Learning Techniques) Department of Automation, University of Science and Technology of China (USTC), Anhui province, Hefei, China 2017 MS(CS) [Master of Science (Computer Science)] (3D Face Recognition) Iqra University, Islamabad Campus, Pakistan 2010 MCS [Master of Computer Science] (MD5 Cracking using Cluster Computing) COMSATS Institute of Information Technology, WAH

DR. RASHID MAHMOOD

Professor / HoD

Department of Mathematics rashid.mahmood@namal.edu.pk

Summary

Dr. Rashid Mahmood received Ph.D. degree in Computational Mathematics with specialization in Computational Fluid Dynamics from Dortmund university of Technology, Dortmund, Germany in 2012. He has more than 20 years of teaching and research experience at university level. His research interests include CFD using Lattice Boltzmann Methods, Finite Element Methods, Artificial Neural Networks for CFD. He has published 70 research articles in impact factored international journals. He has supervised 5 Ph.D. and 24 MS students so far. Dr. Rashid has presented his research at many national and international conferences. He has been a resource person in numerous training workshops.

Academic Background

Ph.D. (Lattice Boltzmann Simulations for Computational Fluid Dynamics) TU Dortmund Germany 2012 MS Mathematics (Thin film flows of non-Newtonian fluids) CIIT Islamabad 2005

DR. RASHID MAHMOOD

Professor / HoD

Department of Mathematics rashid.mahmood@namal.edu.pk

Summary

Dr. Rashid Mahmood received Ph.D. degree in Computational Mathematics with specialization in Computational Fluid Dynamics from Dortmund university of Technology, Dortmund, Germany in 2012. He has more than 20 years of teaching and research experience at university level. His research interests include CFD using Lattice Boltzmann Methods, Finite Element Methods, Artificial Neural Networks for CFD. He has published 70 research articles in impact factored international journals. He has supervised 5 Ph.D. and 24 MS students so far. Dr. Rashid has presented his research at many national and international conferences. He has been a resource person in numerous training workshops.

Academic Background

DR. SHAFIQ UR REHMAN KHAN

Assistant Professor

Department of Computer Science shafiq.rehman@namal.edu.pk

Summary

Dr. Khan holds a PhD from Capital University of Science and Technology (CUST), Islamabad. Following his doctorate, he has served in various academic roles, including Assistant Professor, Head of Department, Provost, Director of the Business Incubation Center, and as a member of several key committees. With over 8 years of combined industry and academic experience, his research interests encompass Natural Language Processing, Machine Learning, Artificial Intelligence, Information Retrieval and Graph Theory. Dr. Khan has published extensively in reputed journals and continues to contribute by supervising 15 BS projects, 9 MS and 1 PhD scholars in areas such as NLP, Machine Learning, Artificial Intelligence, Blockchain, and Information Retrieval.

Academic Background

PhD Computer Science (Natural Language Processing, Machine Learning, Artificial Intelligence, Information Retrieval) Capital University of Science and Technology 2019 MS Software Engineering (Software Engineering, Formal Methods in Software Engineering) Bahira University, Islamabad 2010 BS Information Technology (Information Technology) Gomal University 2007

Experience

Unveiling temporal patterns in information for improved rumor detection 13-Mar-2025 Rumor detection is a critical task for addressing the spread of misinformation and maintaining the credibility of information sources. Natural Language Processing (NLP) techniques have been employed to propose efficient and effective methods for rumor detection. In the wake of the widespread COVID-19 pandemic, the world has faced extensive strain on health, economics, and social structures. The dissemination of false or inaccurate information on social media, whether intentionally malicious or unintentional, has had detrimental

consequences for individuals and society, particularly during critical situations like real world emergencies. In this study, we aim to explore the textual and temporal features present in social media posts (specifically tweets) related to COVID-19 to detect rumors as time is unique feature of text and any event can be mapped on timeline. Previous studies utilized the textual fe...

MR. SALEEM ULLAH

Assistant Soil Chemist

AgriTech 150 soilchemist@namal.edu.pk

Summary

Mr.Saleem Bourana obtained his M.Sc. (Hons) in Soil Science from the University of Sargodha in Pakistan. He started his work at the National Agricultural Research Institute (NARC). As a lab analysist, he worked in Engro Fertilizer Ltd and AJK Coal Mining Company (PVT). He previously joined the NAAC as an Assistant Soil Chemist at Namal University in Mianwali. He assists NAAC with agronomical experiments, field supervision at Namal AgriTech Park and research publications

Academic Background

MSc (Hons) Soil Science (INTEGRATED EFFECT OF BIOCHAR AND VERMICOMPOST ON PRODUCTION OF WHEAT (Triticum aestivum L.) AND SOIL HEALTH) UOS 2020 BSc (Hons) Soil and Environmental Science (Relationship of Soil Physical & Chemical Properties with Aggregate Stability in Wheat Soil) UOS 2014

Journal Publications

Past Trends and Future Outlook of Maize Crop Production Pattern in Pakistan 15-Oct-2025 This study analyzes the transformation of provincial maize production shares in Pakistan (2001–2023) using a Markov chain model and projects future trends (2024–2030) under a business-as-usual scenario. Results indicate Punjab's dominant and expanding role in maize production, contributing over 90% by 2030. The findings highlight the need for policy interventions to promote regional diversification in maize cultivation for balanced agricultural growth. Assessment of various herbicides for weed management and their impact on wheat yield components in rice-wheat cropping system in punjab, pakistan 18-Feb-2025 Evaluating the efficacy and safety of herbicides is essential for sustainable weed management. This study aims to assess the effectiveness of selected herbicides in controlling weed populations, their impact on wheat growth parameters and their overall influence on wheat yield components in a ric...

Embracing the metaverse: cultivating sustainable tourism growth on a global scale 13-Aug-2024 This paper addresses this gap by exploring the metaverse's potential to advance sustainable practices in tourism, aligning with sustainable development goals (SDGs). By integrating three behavioural theories – the Theory of Planned Behavior, Technology Acceptance Model, and Self-Determination Theory – this research provides a comprehensive framework to assess the impact of metaverse tourism on sustainability and identify the most relevant SDGs. Conceptualization and validation of customer participation in health care: a study on chronic illnesses management 19-Jun-2024 Contrary to want-based services, customer participation has got lesser attention in high-credence services like health care. Customer participation for patients with chronic illnesses could be life-threatening and goes beyond the service organization's physical environment. Realizing the importance of transformative service rese...

Academic Background

MS in Electrical Engineering (A Novel Machine Learning Based Approach for fault classification in Photovoltaic Array) EME NUST 2020

Experience

Lecturer CAE NUST 01-Mar-2022 - 26-Aug-2024

Journal Publications

A Novel Convolutional Neural Network-Based Approach for Fault Classification in Photovoltaic Arrays 28-Feb-2020 Fault diagnosis in photovoltaic (PV) arrays is essential in enhancing power output as well as the useful life span of a PV system. Severe faults such as Partial Shading (PS) and high impedance faults, low location mismatch, and the presence of Maximum Power Point Tracking (MPPT) make fault detection challenging in harsh environmental conditions. In this regard, there have been several attempts made by various researchers to identify PV array faults. However, most of the previous work has focused on fault detection and classification in only a few faulty scenarios. This paper presents a novel approach that utilizes deep two-dimensional (2-D) Convolutional Neural Networks (CNN) to extract features from 2-D scalograms generated from PV system data in order to effectively detect and classify PV system faults. An in-depth quantitative evaluation of the proposed approach is present...

Ms. Asma Raza is currently serving as a Lecturer in the Department of Mathematics at Namal University, Mianwali. She earned her MS degree in Mathematics from COMSATS University Islamabad and her BS degree from Fatima Jinnah Women University, Rawalpindi. Her research interests span Applied Mathematics, Elasticity Theory, and Computational Methods. She aspires to contribute both in teaching and research by bridging theoretical concepts with practical applications.

Academic Background

MS Mathematics (Asymptotic Analysis of Elastic Three-layered Plate Supported by Elastic Foundations) COMSATS University Islamabad 2022 BS Mathematics ( ) Fatima Jinnah Women University, Rawalpindi 2019

Courses

MS. SANA PERVEEN

Lab Engineer

Department of Electrical Engineering 197 sana.perveen@namal.edu.pk

Summary

Sana Perveen has completed her Bachelor's degree from UET Taxila and is a recipient of the Bronze Medal. Her Final Year Project focused on the classification and detection of lung nodules using advanced image processing techniques, aiming to support early diagnosis in medical imaging. Her research interests include Digital Signal Processing, Image Processing, Control Systems, and Industrial Automation. She has hands-on experience with Programmable Logic Controllers (PLCs) and their programming, which has strengthened her expertise in automation systems. She is proficient in Python and MATLAB and is dedicated to fostering student engagement through hands-on learning and the practical application of computational tools.

Academic Background

Bachelors of Science in Electrical Engineering (Detection and Classification of lung nodules using advanced image processing techniques, aiming to support early diagnosis in medical imaging.) University of Engineering

MS. ALIZA

Lab Engineer

Department of Electrical Engineering aliza@namal.edu.pk

Summary

I hold a Bachelor's degree in Electronics Engineering from Mehran University of Engineering and Technology (MUET) and a Master's degree in Electronics Engineering from Kadir Has University, Turkey. My academic and research background focuses on Virtual Reality (VR) and Augmented Reality (AR).

Academic Background

MSc ( ) Kadir Has University 2024 BE ( ) Mehran University of Engineering and Technology 2021

Journal Publications

Visuo-haptic exploration with relocated haptic feedback: impact of virtual and augmented reality 29-Jul-2025 Rendering haptic feedback on the wrist is an effective solution for freeing users' hands during virtual interactions while still providing haptic feedback, mostly focusing on Virtual Reality (VR) environments. Unfortunately, whether these solutions can be extended to Augmented Reality (AR) interactions has not been

investigated before. In this paper, we investigate the perceptual differences between VR and AR environments with a user study experiment based on a stiffness discrimination task. Our findings revealed similar task accuracy and sensitivity in VR and AR but different exploration behaviors (i.e. higher interaction time in AR) and user experience (i.e. higher enjoyment and less mental fatigue in AR).

Conference Publications

Enhancing Eye-Hand Coordination in Volleyball Players: A Comparative Analysis of VR, AR, and 2D Display Technologies and Task Instructions 21-Oct-2024 Previous studies analyzed user motor performance with Virtual Reality (VR) and Augmented Reality (AR) Eye-Hand Coordination Training Systems (EHCTSs) while asking participants to follow specific task instructions. Although these studies suggested VR & AR EHCTSs as potential training systems for sports players, they recruited participants for their user studies among general population. In this paper, we examined the training performance of 16 professional volleyball players over 8 days using EHCTSs with three display technologies (VR, AR, and 2D touchscreen) and with four distinct task instructions (prioritizing speed, error rate, accuracy, or none). Our results indicate that volleyball players performed best with 2D touchscreen in terms of time, error rate, accuracy, precision, and throughput. Moreover, their performance was superior wh...

MS. FAIQA ALI

SENIOR LECTURER

Department of Mathematics 121 faiqa@namal.edu.pk

Summary

Since 2013, Ms. Faiqa Ali has held the position of Senior Lecturer in the Mathematics Department at Namal University, Mianwali. She began working towards her Ph.D. in mathematics at UET, Taxila, in 2019. She received her MS degree (Mathematics) from COMSATS Abbottabad in 2013. She graduated with a Bachelor degree (Mathematics) in 2010 from COMSATS Islamabad Her research interests cover numerical solutions of PDEs in engineering and science.

Academic Background

PhD in Mathematics (Numerical solutions of PDEs in engineering and science) UET Taxila, Pakistan in progress MS Mathematics (MS thesis in financial mathematics entitled “Analysis of the Value Function of the American Option in Jump Diffusion Process on a Dividend-Paying Stock” was done under the supervision of Dr. Sultan Hussain, COMSATS Abbottabad) COMSATS Abbottabad 2013 BS Mathematics (Analysis of Inflation of Measures) COMSATS Islamabad 2010

Experience

Senior Lecturer Namal University 04-Sep-2013 - continue Visiting Faculty Gov. College for Management Sciences, Abbottabad 10-Dec-2012 - 20-Jul-2013

Journal Publications

A systematic framework for classification of parameter space dynamics in the Duffing oscillator 21-Oct-2025 Results in Engineering, Volume 28, Pages 107857 (2025) Comprehensive classification of multistability and Lyapunov exponent with multiple dynamics of nonlinear Schrödinger equation 23-Dec-2024 Nonlinear Dynamics, Volume 113, Pages 10335–10364 (2025) Numerical Solution of PDE's 20-Dec-2021 Solitonic, quasi-periodic, super nonlinear and chaotic behaviors of a dispersive extended nonlinear Schrödinger equation in an optical fiber Numerical Solutions of PDE’s 06-Mar-2020 New complex waves of perturbed Shrödinger equation with Kerr law nonlinearity and Kundu-Mukherjee-Naskar equation Finacial Mathematics 05-Jun-2017 Evolution of American option value function on a dividend paying stock under jump-diffusion processes

Courses

Probability and Statistics Linear Algebra Differential Equations Caculus III Calculus 1

MS. ZULAIKHA KIRAN

SENIOR LECTURER

Department of Electrical Engineering 117 zulaikha.kiran@namal.edu.pk

Summary

Faculty Member working at Namal since 2017.

Academic Background

Master of Science The University of Manchester 2016 Bachelor of Engineering NUST, Islamabad 2013

Experience

Senior Lecturer Namal University, Mianwali 07-Aug-2017 - continue

Courses

Digital Signal Processing Digital Image Processing

DR. M. NAJAM UL ISLAM

Rector

Namal University, Mianwali 129 rector@namal.edu.pk

Summary

23+ years' versatile experience of Information Communication Technology (ICT) domain in academia, industry, and Government. 12+ years' experience of academic managements and Research & Development Management; as Head of Engineering Department, Dean – Faculty of Engineering Sciences, Head (Principal Investigator) of Research Lab, and Rector of Higher Education Institute. Vast experience of working with government, international organizations and regulatory bodies for programs' accreditation, curriculum development, academic management, quality assurance and international events' organization. Head of Research Lab (35+ Professionals) and Research Groups in the domains of Information Security, Embedded Systems and Wireless Communications; having 90+ publications in referred journals and conferences, and PKR 130 Million research funding during the last 5 years. Launched 04 products, organized 12 trainings and workshops with 300+ participants including professionals from LEAs, Public & Corp...

Academic Background

Ph.D (Electronics & Communications) Telecom Paris, France 2010 Masters by (Research in Information & Communication) Ecole Polytechnique, University of Nice – Sophia Antipolis, France 2006 M.S. (Computer Science) Lahore University of Management Sciences (LUMS), Lahore, Pakistan 2005 B.Sc. (Electrical Engineering) University of Engineering and Technology (U.E.T.) Lahore, Pakistan 1998

Experience

Rector Namal University, Mianwali, Pakistan 01-Sep-2022 - continue Professor Bahria University Islamabad, Pakistan 01-Jan-2011 - 01-Sep-2022 RF Planning & Optimization Consultant Smart Cube Technologies, Pakistan 01-Oct-2010 - 01-Jan-2011 Visiting Scholar, Institute for Integrated Signal Processing Systems (ISS) RWTH, Aachen, Germany 01-Jan-2009 - 01-Sep-2010 Research Engineer, Mobile Communications Department Eurecom, Sophia Antipolis, France 01-Oct-2006 - 01-Sep-2010 Radio Network Planning & Optimization Engineer Huaxin Consulting Pakistan 01-Jan-2005 - 01-Jul-2005 Adjunct Faculty, Computer Sciences Department LUMS, Lahore, Pakistan 01-Jan-2003 - 01-Dec-2004 Assistant Manager (Technical) NDC [NESCOM], Islamabad, Govt. of Pakistan 01-May-1999 - 01-Dec-2004 Electrical Engineer MASCOT Engineering Services of Pakistan 01-Nov-1998 - 01-May-1999

DR. WAHAB ALI SHAH

Assistant Professor

Department of Electrical Engineering 169 wahab@namal.edu.pk

Summary

Wahab Ali Shah received his B.S. degree in Electrical Engineering from CECOS University, Peshawar, Pakistan, in 2011. He earned his M.S. degree in Electrical Engineering with a specialization in Power Systems from Near East University (NEU), Turkey, in 2016, and completed his Ph.D. in Electrical Engineering with a specialization in High Voltage Engineering and Insulation Technology at the School of Electrical and Electronic Engineering, Huazhong University of Science and Technology (HUST), Wuhan, China. Since 2019, he has served as an Assistant Professor in the Department of Electrical Engineering at Namal University, Mianwali, Pakistan. He has also been affiliated with Hubei University of Technology (HBUT), Wuhan, China, and is currently engaged in teaching and research at Nanjing University of Posts and Telecommunications (NJUPT), China. His research interests include long air-gap discharge observation and simulation (electrical discharge, lightning discharge, lightning attachment), ...

Academic Background

Ph.D. in Electrical Engineering (High Voltage Engineering) (Experimental Study on the Final Jump Phase in Long Air Gap Discharges) Huazhong University of Science and Technology (HUST), Wuhan, P.R. China 2019 MS in Electrical Engineering (Power Systems) (Analysis and Design of IPT Systems for Automotive Battery Charging Applications) Near East University (NEU), Mersin -10 Turkey 2016 B.Sc. in Electrical Engineering (Control of Home Appliances Using Voice) CECOS University of Information Technology and Emerging Sciences, Peshawar, Pakistan 2011

Experience

Senior Lecturer Detroit Green Technology Institute, Hubei University of Technology (HBUT), Wuhan, China 01-Sep-2024 - 31-Jan-2025 Lecturer Government Polytechnic Institute at GTTTC Hayatabad Phase VII, Peshawar, Pakistan 01-Nov-2011 - 30-Oct-2013

Honours and Awards

The Academic Excellence Award Honored with The Academic Excellence Award in the year 2018 by Deanship of Graduate Studies, Huazhong University of Science & Technology (HUST) Wuhan, China in appreciation for Publishing in reputed SCI Journals. 01-Nov-2018

Journal Publications

DR. SAMI UD DIN

Associate Professor/HOD

Department of Electrical Engineering 162 sami.uddin@namal.edu.pk

Summary

SAMI UD DIN. received a B.S. degree in 2009 and an M.S. degree in Electronics Engineering (Control Systems) from Muhammad Ali Jinnah University (M.A.J.U), Islamabad, Pakistan, in 2012. He has completed his Ph.D degree in Electrical Engineering with a specialization in Control Systems from the Capital University of Science and Technology (C.U.S.T), Islamabad, Pakistan, in 2019. He was associated with the Department of Electrical Engineering at The University of Lahore, Islamabad Campus, Pakistan, till Oct 2019 (as HoD/Assistant Professor.) Now, he is associated with the Department of Electrical Engineering at Namal University, Mianwali, Pakistan.

Academic Background

PhD in Electrical Engineering (Non-linear Control, Sliding Mode Control, Under-actuated Systems, Higher Order Sliding Mode Control, Marine and Aerial Vehicles, Chaotic Systems, Power Systems, Robotics and Electromechanical Systems.) Capital University of Science and Technology (C.U.S.T) Islamabad 2019 MS Electronics Engineering (Non-linear control, Sliding mode control, Under-actuated systems, Chaotic systems, Robotics.) Modified triple modular redundancy based fault-tolerant three-phase matrix converter design with AI driven diagnostic capabilities 11-Mar-2025 Three-Phase Matrix Converters (TPMCs) are mostly used in various potential applications, including aircraft, wind turbines, and AC drives. These system applications are endangered by severe disruptions due to critical faults in power electronic switches, which can cause whole system shutdowns and component damage. To reduce these risks and ensure reliable operation under faulty conditions, a robust Fault-Tolerant Control System (FTCS) for TPMC is essential. This paper introduces the diagnosed open-circuit switches fault and fault-tolerant control for TPMCs. The Fault Detection and Isolation (FDI) unit is recommended for integration with the Artificial Neural Networks (ANN) based FTCS to identify and isolate defective switches. The FDI unit is additionally outfitted with Modified Triple Modular Redundancy (MTMR) to ensure fault tolerance. To prev...

To reduce these risks and ensure reliable operation under faulty conditions, a robust Fault-Tolerant Control System (FTCS) for TPMC is essential. This paper introduces the diagnosed open-circuit switches fault and fault-tolerant control for TPMCs. The Fault Detection and Isolation (FDI) unit is recommended for integration with the Artificial Neural Networks (ANN) based FTCS to identify and isolate defective switches. The FDI unit is additionally outfitted with Modified Triple Modular Redundancy (MTMR) to ensure fault tolerance. To prev...

DR. SAMI UD DIN

Associate Professor/HOD

Department of Electrical Engineering 162 sami.uddin@namal.edu.pk

Summary

SAMI UD DIN. received a B.S. degree in 2009 and an M.S. degree in Electronics Engineering (Control Systems) from Muhammad Ali Jinnah University (M.A.J.U), Islamabad, Pakistan, in 2012. He has completed his Ph.D degree in Electrical Engineering with a specialization in Control Systems from the Capital University of Science and Technology (C.U.S.T), Islamabad, Pakistan, in 2019. He was associated with the Department of Electrical Engineering at The University of Lahore, Islamabad Campus, Pakistan, till Oct 2019 (as HoD/Assistant Professor.) Now, he is associated with the Department of Electrical Engineering at Namal University, Mianwali, Pakistan.

Academic Background

PhD in Electrical Engineering (Non-linear Control, Sliding Mode Control, Under-actuated Systems, Higher Order Sliding Mode Control, Marine and Aerial Vehicles, Chaotic Systems, Power Systems, Robotics and Electromechanical Systems.) Capital University of Science and Technology (C.U.S.T) Islamabad 2019 MS Electronics Engineering (Non-linear control, Sliding mode control, Under-actuated systems, Chaotic systems, Robotics.) Muhammad Ali Jinnah University (M.A.J.U), Islamabad 2012

Experience

Associate Professor Namal University Mianwali 01-Mar-2023 - continue Assistant Professor Namal University Mianwali 01-Nov-2019 - 28-Feb-2023 Head of Electrical Engineering Department / Assistant Professor The University of Lahore, Islamabad Campus 12-Dec-2013 - 31-Oct-2019 Assistant Professor (AP)/ Head Labs The University of Lahore, Islamabad Campus 01-Oct-2012 - 01-Nov-2013 Lecturer The University of Lahore,

Islamabad Campus 01-Oct-2011 - 30-Sep-2012 Management Trainee Engineering Development Board 15-Apr-2010 - 14-Apr-2011

From Green Intentions to Actions: The Role of Covert, Overt, and Guerrilla Marketing in Promoting Green Consumerism 25-Nov-2025 Traditional marketing tactics have been significantly challenged by marketers in various areas, especially in the food sector. Firms utilize overt, along with emerging marketing communication strategies in the form of covert marketing, to circumvent customer skepticism and build a good brand image. However, there is limited empirical research that integrates these traditional and novel marketing techniques in green consumerism to develop green purchase intentions and ecologically conscious consumer behavior (ECCB). Therefore, the current study investigates the impact of green product features, green pricing, covert advertising, overt advertising, and guerrilla marketing on purchase intention and ECCB. Furthermore, the study evaluates the moderating impacts of brand evangelism, environmental knowledge and habitat attitude in order to bridge the intention-behavi...

Adaptive Auditory Feedback: A New Method for Desktop Assistance of the Visual Impaired People 09-Oct-2018 This paper presents a new technique of adaptive auditory feedback in desktop assistance for the people with visual impairment. Adaptive auditory feedback is based on switching between speech only and non-speech only (i.e., Spearcons) sounds. The auditory feedback adaptively changes that changing based on user mode. Active users are assigned with speech only while the engaged users with the non-speech only auditory feedback. Ten participants perform tasks on desktop computers using within-subject design. The proposed adaptive auditory feedback is more efficient in comparison to speech only and non-speech auditory feedbacks. It can also improve a user experience in the desktop environment. Finally, it may help dierent researchers to use adaptive auditory feedback as a substitute for speech only or non-speech auditory feedback during the designing of accessibility software, tools, and...

Parental Prioritization-Based Task Scheduling in Heterogeneous Systems 17-Jan-2019 Efficient task scheduling is important for achieving high performance in heterogeneous distributed computing systems. The main focus of this research is to build a task-scheduling algorithm for a heterogeneous environment. We proposed an algorithm named parental prioritization earliest finish time. It has two phases, task prioritization phase and processor assigning phase. In the tasks prioritization phase, tasks will schedule in the parental priority queue (PPQ) on the basis of downward rank and parental priority. Task prioritization is based on the directed acyclic graph. It can schedule the task of successor row before the current row if it has less communication cost. In the processor assigning phase, the processor will allocate to the scheduled tasks

obtained from PPQ keeping the computation cost to a minimum. This proposed algorithm is compared with HEFT and CPOP algorithms through graphs generated...

Conference Publications

Flexible Genetic Algorithm Operators for Task Scheduling in Cloud Datacenters 29-Jan-2021 Cloud computing is the backbone of the modern information technology industry. Due to the increase in internet usage, social media, and smart phones, a large amount of data is producing. Cloud datacenters can provide resources to handle this data. If data is not properly handled, it can cause overhead on cloud servers and can increase operational costs. Genetic algorithm is used to solve scheduling problem efficiently, but they take a lot of time to find an optimal solution. In this paper, we proposed Flexible Genetic Algorithm Operators (FGAO) for Task Scheduling in Cloud Datacenters. This algorithm changes crossover and mutation operators according to the quality of scheduling solutions. Instead of giving a fixed stopping criteria algorithm uses flexible crossover and mutation operators as a stopping criterion. Experimental results show that the proposed FGAO algorithm reduces 40% execution time...

Green Namal

Think Green Save The Enviroment The vision of building Namal Knowledge City thrives on the very premise of protecting our natural, social and physical environment, particularly that of Namal Valley. The objective is to provide an enabling academic and professional environment to our students to nurture a culture of environment protection that is an essential requirement for prosperous and progressive Pakistan. The word GREEN symbolizes the colors of paradise while the word Namal (translated ‘anmoal’ in Urdu) means priceless (invaluable) land. The topography, the landscape, the monuments and the cultural history of Namal valley embraces in its fold the very essence of Green Namal philosophy. The natural world is a source of inspiration for its visual beauty that is the basis for life on earth. The Green Namal initiative is meant to motivate all members of the Namal Family to inculcate a sense of responsibility and commitment to become ecologically conscious individuals. We are committed...

Think Green Save The Enviroment

The vision of building Namal Knowledge City thrives on the very premise of protecting our natural, social and physical environment, particularly that of Namal Valley. The objective is to provide an enabling academic and professional environment to our students to nurture a culture of environment protection that is an essential requirement for prosperous and progressive Pakistan. The word GREEN symbolizes the colors of paradise while the word Namal (translated ‘anmoal’ in Urdu) means priceless (invaluable) land. The topography, the landscape, the monuments and the cultural history of Namal valley embraces in its fold the very essence of Green Namal philosophy. The natural world is a source of inspiration for its visual beauty that is the basis for life on earth. The Green Namal initiative is meant to motivate all members of the Namal Family to inculcate a sense of responsibility and commitment to become ecologically conscious individuals. We are committed to the notion that a cleaner & ...

Namal Valley

Namal Valley lies some 30 kilometers away from Mianwali city and is nestled amidst the Koh-i-Suleiman and Salt Range along the border area of Punjub and KPK. The valley has a unique topography and boasts numerous lakes of which Namal is most visible. The valley is also speckled with numerous smaller lakes that stretch up to the valley of Soon Sakesar on the highest point of the Salt Range. The economy is largely agrarian with farming and livestock dominating the economic activity in the area. Namal Valley is also known as a sanctuary for many migrant species of birds and animals that thrive in perfect ecosystem.

namal lake

Namal Lake is the most prominent feature of Namal Valley. It has a surface area of approximately 5 square kilometers and is the largest of the many lakes that are spread across the valley. The surrounding area serves as grazing pastures for animals that the inhabitants of the Valley rear as a source of income. It is an attractive tourist resort as people from across the Namal valley and beyond visit this place as a picnic spot. It also serves as a perfect abode for various species of birds like Russian ducks and Siberian cranes that migrate to this place during winters. Namal University is erected to its West on a high pedestal in the foothill of a scenic mountaintop. The Student Support Office of Namal University is very active through various student societies to make the best use of this natural gift for recreational, sports and academic activities.

namal dam

The dam was built by the British Government in 1913 to conserve water coming from numerous streams of water that eventually gave shape to what is now Namal Lake. It was aimed at creating a water resource for irrigating vast tracts of barren land to the western side of Mianwali. For over a century the dam has served as a constant source of precious water for the farmers in the area. It also serves as an exciting excursion point for the tourists as Namal Lake winds through the mountains that make it an attractive point for boating across the lake up to the dam.

Namal Knowledge City

An Inspiration, A Dream

Developed nations across the world have relied on knowledge as the engine of growth. Throughout history knowledge cities like Oxford and Cambridge Universities have led to economic prosperity, technological breakthroughs, and cultural and social welfare. Even after hundreds of years these cities thrive with knowledge as foundation stone. Namal Knowledge City is an ambitious project that carries on this example of creating a knowledge economy in the heart of Pakistan. It will be the first project of its kind in the country bringing together knowledge workers from all over the world to constitute one of Pakistan's largest consortiums to acquire, create, disseminate, and utilize knowledge. A key feature will be the sustainable development of the knowledge city and communities in Pakistan at large. As a step forward, Sports Facilities, Talent Advancement Center and Expansion of Academic Block will be completed by March 2026. The knowledge city will include academic blocks, libraries, techn...

Overview

The Namal Wellness Centre was established by the collaborated efforts of University and Clinical Psychologist Ms. Komal Zafar. The purpose of the student counselling service is to assist students in addressing a range of issues that come up while attending university. The Centre offers students an opportunity to explore these issues and difficulties in a confidential setting under the supervision of qualified and experienced experts. What are students saying about Namal Wellness Centre Comment # 05 • Your support has been invaluable in helping me overcome stress, and I'm excited to see the Wellness Centre in action. Comment # 06 • The behavior of the psychologist, and her attention towards each word said were really amazing. • It's a good step to normalize taking precautions about mental health just like physical health. She has made this easy for the students to go to her and cry our heart out. Comment # 07 • As I used to visit you previously, it was the best experience. Your consulta...

Comment # 05 • Your support has been invaluable in helping me overcome stress, and I'm excited to see the Wellness Centre in action. Comment # 06 • The behavior of the psychologist, and her attention towards each word said were really amazing. • It's a good step to normalize taking precautions about mental health just like physical health. She has made this easy for the students to go to her and cry our heart out. Comment # 07 • As I used to visit you previously, it was the best experience. Your consultancy services were so admirable. • Whenever I had odd feelings about any matter and visited you by booking slots, you always tapped my shoulder and encouraged me. • You brought satisfaction in my activities and life, whenever I needed that. You made my day and were present under any condition when I asked for consultancy. Comment # 08 • I wanted to express my heartfelt gratitude for the insightful interaction we had during our recent session. • Your expertise and understanding provided v...

Mission

Namal Wellness Centre is dedicated to strengthening your mind, body, and soul through a variety of holistic treatments. Our enthusiastic therapist offer personalized services designed to promote relaxation and overall well-being. Our mission is to support you on your journey to optimal wellness, believing in the transformative power of holistic care.

Objective

Namal University recently inaugurated its new Wellness Centre. The inauguration ceremony was presided over by esteemed guest Prof. Dr Uzma Masroor (Consultant Clinical Psychologist, STMU, ISB), Dr. M. Najam-Ul-Islam, Rector of Namal and Dr. Rauf Sheikh, Registrar. The primary objective of the Wellness Centre is to foster holistic health and well-being among the university's students, staff, and faculty members.

Services and Appointment

Our counseling services emphasize confidentiality and offer safe space for discussing personal concerns. The counselling services are available for Namal community at Namal Wellness Centre. If you are facing difficulties such as Academic difficulties Anger Anxiety Bullying Depression Lack of confidence Lack of self-esteem Overthinking Stress We also conduct post-session follow-ups to help maintain mental health gains to ensure continued progress.

Line Following Robot Challenge

Namal University Mianwali conducted the Line Following Robot Challenge as part of its semester project evaluation, where teams of three to four students demonstrated applied competencies in feedback control, sensing, and autonomous navigation. The event effectively bridged theoretical concepts with real-world embedded implementation while showcasing precision, optimization, and system integration, thereby reinforcing the university's commitment to outcome-based, hands-on engineering education.

Namal Tech Expo 2025

The Department of Electrical Engineering at Namal University, Mianwali, proudly launched the Namal Tech Expo 2025 on April 14th with a dynamic opening ceremony, honored by the presence of our esteemed Rector, Prof. Dr. M. Najam Ul Islam. This landmark event brought together 451 talented students from 21 leading universities, forming 173 multidisciplinary teams from three provinces of Pakistan. The expo served as a vibrant hub of innovation, intellectual exchange, and creative problem-solving — showcasing the immense potential of the next generation of engineers and technologists. We were delighted to host distinguished guests, faculty, and participants whose enthusiasm and expertise set an inspiring tone for the days ahead. Namal Tech Expo 2025 is not just an event — it’s a celebration of innovation, collaboration, and academic excellence.

Professional Development Sessions

The Placement Office at Namal University organized two impactful sessions to equip students with the skills and direction needed for professional growth. We were honored to host Ms. Hadiqa Bukhari, who conducted a session on Career & Personality Development, focusing on confidence building and professional growth. We also welcomed Mr. Ahmad Manzoor, who delivered an insightful session on Emerging Technology Trends & Career Pathways, highlighting future-focused opportunities in the tech landscape. We sincerely thank both speakers for their valuable insights and contributions toward preparing our students for a competitive global market.

Line Following Robot Challenge

Namal University Mianwali conducted the Line Following Robot Challenge as part of its semester project evaluation, where teams of three to four students demonstrated applied competencies in feedback control, sensing, and autonomous navigation. The event effectively bridged theoretical concepts with real-world embedded implementation while showcasing precision, optimization, and system integration, thereby reinforcing the university’s commitment to outcome-based, hands-on engineering education.

Namal Conducts PREE Review of BS Computer Science under PSG Framework 2023

Namal University Mianwali conducted the PREE review of the BS Computer Science program under the PSG Framework 2023. External auditors Prof. Dr. Ayyaz Hussain from Quaid-e-Azam University, Islamabad, and Prof. Dr. Arshad Ali from FAST-NUCES, Lahore, evaluated the program through SAR review and interactive sessions with faculty and students. The review reaffirmed Namal's commitment to academic excellence, quality assurance, and continuous improvement.

Namal University Inaugurates IEEE Student Branch

A proud milestone for Namal University as we successfully inaugurated the IEEE Student Branch, marking the beginning of a new chapter in student leadership, innovation, and global professional engagement! The inauguration ceremony brought together faculty, students, and distinguished guests, including Dr. Nosherwan Shoaib, Chair IEEE Islamabad Section, who graced the occasion as the Chief Guest and inaugurated the branch. With this milestone, Namal University reaffirms its commitment to technical excellence, research culture, and international collaboration through IEEE. We’re looking forward to a prosperous journey of empowering future engineers, innovators, and leaders!

QEC Conducts PREE Review of BBA Program

Ensuring continuous improvement and academic excellence, the Quality Enhancement Cell (QEC) of Namal University Mianwali conducted the Program Review for Effectiveness and Enhancement (PREE) of the BBA program on January 26, 2026, in accordance with the PSG Framework 2023. The review was carried out by distinguished external reviewers Dr. Zehra Waheed, Associate Dean Academics (Undergraduate Programs), LUMS, and Dr. Zahid Riaz, Associate Professor and seasoned NBEAC Trainer & Evaluator, Lahore School of Economics. The Assessment Team conducted a comprehensive evaluation of the Self-Assessment Report (SAR) and held interactive sessions with BBA students and faculty, reaffirming Namal University's strong commitment to quality assurance, academic rigor, and continuous improvement. Namal University sincerely appreciates the reviewers for their valuable insights and constructive feedback, which will further strengthen the academic quality and effectiveness of the BBA program.

Career Development and Placement Center

The Career Development & Placement Center (CD&PC;) at Namal University is dedicated to preparing students for successful professional careers by bridging the gap between academia and industry. The Center ensures that students graduate with strong academic foundations, complemented by professional skills, industry exposure, and career opportunities required to thrive in competitive job markets. CD&PC; serves as the central and exclusive platform for all placement, internship, and career development activities at the University. Vision, Mission & Purpose The mission of the Career Development & Placement Center is to support students and alumni in identifying and securing relevant job opportunities, internships, and pathways to higher education. By fostering strong and sustainable relationships with employers, industry partners, and higher education institutions, the Center enables a smooth transition from academic life to professional careers. CD&PC; aims to: Facilitate student placements f...

About

Chairman's Message Rector's Message Vision and Mission Core Values The Namal Story Namal Knowledge City Board of Governors Senior Management Team HEC Recognition Policies

Rector's Message

Welcome to the Namal University! Namal University, part of the envisioned Namal Knowledge City, is designed to integrate education with employability to enable talented youth to become economically useful and socially robust citizens of Pakistan. Namal University sits on a total of 1,000 acres in Pakistan’s Salt Range in an area comprising of hills and crags overlooking Namal Lake. This area has a high level of biodiversity and is home to several wildlife sanctuaries. The scenic beauty of Namal University is spellbinding. Namal is home to a well-knitted and vibrant community of students, faculty, and staff. A strong value system, based on merit, integrity, tolerance, excellence, commitment & social responsibility is integrated to become a center of excellence. Our student body is diverse with respect to gender, region, socio-economic and educational background. Our faculty is a group of dedicated scholars and teachers whose research expands the boundaries of our knowledge and imaginati...

Namal Environmental Club (NEC)

The mission of NES is to help preserve the notion of “green namal” by contributing to it actively. There are dozens of students who eagerly take part in plantation drives and are dedicated to sustainability and conserving the environment of Namal and its nearby areas. NES helps to maintain vicinity of the campus with the help of its members and other volunteers. It helps explicate the significance of environmental preservation and its seriousness amid all the mass environmental degradation and global warming by conducting various seminars and having over acclaimed environmentalists such as Ms Nasira Habib. It recently inaugurated a fossil museum which depicts the rich fossil history of the area. Aims and Objectives To support and promote environmental sustainability programs in students. Awareness about environmental problems taking place. Holding meetings for instruction and discussions on subjects connected with the theory and practice of Environmental Sustainability. Participation o...

About

Chairman's Message Rector's Message Vision and Mission Core Values The Namal Story Namal Knowledge City Board of Governors Senior Management Team HEC Recognition Policies

The Namal Story

The Namal story began when, in 2005, Imran Khan made the momentous decision to build an academic institution on the banks of the eponymous lake with a vision to empower Pakistan’s youth. Despite early obstacles, Namal College was established in 2008 with the support of the local community and generous donors. The initial 5 acres (40 kanals) of land for this college was provided by Ghulam Muhammad Seelu, a local resident of village Namal. Namal College started its operations with one degree program as an affiliate college of the University of Bradford, UK. In early 2019, Namal was granted degree-awarding status and became Namal Institute. Over time, the dream to build an educational institute has evolved into one for establishing the largest university town in Pakistan by the name of Namal Knowledge City. A comprehensive plan for establishing six academic buildings, student hostels, faculty apartments, a central library, a mosque, an enterprise center and commercial areas has taken shap...

About

Chairman's Message Rector's Message Vision and Mission Core Values The Namal Story Namal Knowledge City Board of Governors Senior Management Team HEC Recognition Policies

Vision & Mission

To become a center of academic excellence for national uplift and development through: Educating bright youth who have Namal values and will contribute to organizations and community. Finding innovative solutions to rural challenges by highly trained academics. Namal University, which is a part of the envisioned Namal Knowledge City, is designed to integrate education with employability to enable talented youth become economically useful and socially robust citizens of Pakistan. The objective is to equip students with necessary academic knowledge and requisite professional skills by establishing a collaborative framework of public as well as private partnerships. Namal Education Foundation and Namal University is working on developing strategic links with both academic institutions and industry to foster a culture of collaboration between industry and the

academia. The idea is to celebrate the interaction of creative, technical and entrepreneurial talent on a common platform to nurture...

3-Day Cybersecurity and CTF Workshop

The 3-Day Cybersecurity & CTF Workshop was held at Namal University, providing students with hands-on experience in real-world cybersecurity. Students explored key areas such as OSINT, Web Security, Cryptography, Reverse Engineering, Forensics, Exploitation, Red & Blue Teaming, and Mobile Security. The workshop concluded with an exciting Capture The Flag competition, where participants applied their skills in a realistic and competitive setting. The event highlighted how practical learning and teamwork strengthen both technical skills and collaboration.

Brain Buffet: From Goals to Success

Namal University invited Ms. Aisha Rasool, Clinical Psychologist, to lead the Brain Buffet: From Goals (Starters) to Success (Dessert) seminar. The session equipped students with essential proactive study strategies, including SMART goal setting and understanding their specific learning styles. The high level of engagement demonstrated a commitment to overcoming common hurdles like procrastination and channeling peer relationships into positive accountability partners.

Line Following Robot Challenge

Namal University Mianwali conducted the Line Following Robot Challenge as part of its semester project evaluation, where teams of three to four students demonstrated applied competencies in feedback control, sensing, and autonomous navigation. The event effectively bridged theoretical concepts with real-world embedded implementation while showcasing precision, optimization, and system integration, thereby reinforcing the university's commitment to outcome-based, hands-on engineering education.

Namal University Hosts 2nd Winter Data School 2026

Namal University organized the 2nd Winter Data School 2026 on Blockchain and AI for Business Excellence! Participants from Telenor Group, Lahore College for Women University (LCWU), Ajmair Foods Limited, Lahore Garrison University (LGU), and other organizations joined us for an exciting and enriching 3-day learning experience. We extend our sincere thanks to our trainer, Mr. Ahmed Manzoor, for delivering insightful and impactful sessions. Along with hands-on learning, the program offered trekking, bonfire nights, a friendly cricket match, and team-building activities creating valuable opportunities for networking, collaboration, and lasting professional connections.

Seminar on Moral Responsibilities in Positive Use of Social Media

Namal University hosted a seminar on “Moral Responsibilities in the Positive use of Social Media, In the Light of the Life of the Holy Prophet (PBUH).” The session highlighted how social media can be a positive tool for learning and communication when used with honesty, respect, and constructive behavior. Participants were encouraged to spread knowledge and harmony online rather than misinformation or negativity, following the moral guidance from the life of the Holy Prophet (PBUH).

What Industry Expects: Writing Code That Scales

Namal University organized an insightful Workshop and Guest Talk led by Mr. Waqas Ghazanfar, Senior Solution Architect at Just Group plc, UK. Students gained hands-on exposure to software architecture for parallel systems, and learned what the industry expects in writing scalable and efficient code — bridging the gap between classroom learning and real-world practice.

PEOPLE

Social Social impact is one of the key values at Namal. Students uphold the spirit of giving back to society through various programs of community service, such as blood drives and providing local kids free-of-cost tuition on campus.

PLANET

Environmental Our goal is to become a leading practitioner of environmental sustainability and instilling this value amongst our students. We do so by ensuring the use of renewable energy resources and recycling waste.

PROFIT

Economic Our students are trained to practically utilize the knowledge acquired during their studies as well as entrepreneurial skills to eventually gain the skills needed to run their own successful business.
